

ASTHETIC TOWNSHIP DEVELOPERS PRIVATE LIMITED
Reg. Office 262, DDA OFFICE COMPLEX, JHANDEWALA EXT., NEW DELHI- 110055

Date: 15/05/2023

To,
The Director
Northern Regional Office (MoEF&CC)
Bays No. 24-25, Sector- 31-A,
Dakshin Marg,
Chandigarh – 160030

Subject: Submission of six-monthly Compliance Report for **June 2023** of the Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana by M/s. Asthetic Township Developers Pvt. Ltd.

Reference: F.No.21-137 /2018-IA-111, **Dated :** 07/02/2019
EC22B038HR138582, **Dated:** 17/11/2022

Dear Sir,

This is with reference to the above-mentioned subject, we are herewith submitting six monthly Compliance Report of **June 2023** for the period of **October 2022 – March 2023** for the Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana by M/s. Asthetic Township Developers Pvt. Ltd. along with the necessary annexure for your kind perusal.

We understand that the above is in line with requirement of Ministry of Environment, Forest and Climate Change, GOI.

Thanking You,
Yours Sincerely,

For M/s Asthetic Township Developers Pvt. Ltd.

(Authorized Signatory)

Enclosure: EC Compliance Report; Soft copy of Report in C.D.

- Copy to:**
1. Member Secretary, Haryana State Pollution Control Board,
C-11 Sec-6, Panchkula, Haryana.
 2. Member Secretary, SEIAA, Haryana, Bay No. 55-58, Parytan
Bhawan 1st floor, Sector 2, Panchkula, Haryana.

Commercial Complex

‘Six Monthly Compliance Report’

**Expansion of Commercial Complex Project at
Sushant Lok, Sector-27, Gurugram Haryana by
M/s. Asthetic Township Developers Pvt. Ltd.**

SUBMITTED BY

**M/s Asthetic Township Developers
Pvt. Ltd.**

JUNE 2023

TABLE OF CONTENT

S. No	Description
Compliance of Specific and General Conditions	

LIST OF ANNEXURES

Annexure	Description
Annexure-I	Environment Clearance Letter
Annexure-II	HSPCB/Consent/: 329962320GUNOCTE7324277dated 03/02/2020
Annexure-III	Aravali NOC
Annexure IV	Renewal of Licence from Directorate of Town & Country Planning, Haryana
Annexure-V	Intekaal Letter
Annexure-VI	AAI NOC
Annexure-VII	STP Design Details
Annexure-VIII	Traffic management plan
Annexure IX	Waste management plan during Construction & Operation Phase
Annexure-X	Photographs of Antismog gun and Logbook
Annexure-XI	Copy of receipt from MCG of C&D Disposal
Annexure-XII	Water Balance Chart
Annexure-XIII	Water assurance letter for water supply from GMDA
Annexure-XIV	RMC Purchase Bill
Annexure-XV	RWH Details
Annexure-XVI	STP Water Bills
Annexure-XVII	Environment Monitoring Reports i.e. AAQ, Noise, Water, Soil & its interpretation
Annexure-XVIII	Environment Management Plan

Annexure-XIX	Copy of Purchase AACs block
Annexure-XX	Landscape Plan
Annexure-XXI	Copies of Newspaper Advertisement
Annexure-XXII	Receiving of Previous Compliance Report of Dec, 2022
Annexure-XXIII	Photographs of wind breaking wall
Annexure-XXIV	Photograph showing excavated topsoil
Annexure-XXV	PUC Certificate
Annexure-XXVI	Photographs of basic infrastructure
Annexure-XXVII	Diesel Bills
Annexure-XXVIII	Current Photograph of site
Annexure-XXIX	Proof of Electricity Connection
Annexure-XXX	Stability Certificate

COMPLIANCE REPORT

Specific and General Conditions as per the Environmental Clearance issued vide letter no. EC22B038HR138582; dated 17/11/2022 (Annexure-I) for Construction and Operation phases of the Project.

S No	Conditions	Compliance
A. Specific Conditions:-		
1.	Sewage shall be treated in the STP based on latest Technology with tertiary treatment i.e. Ultra Filtration to achieve standards ordered by NGT. The Treated effluent from STP shall be recycled /reused for flushing, DG cooling and Gardening. The dimension of each component of STP should be properly designed as per Norms.	Agreed & Noted Sewage would be treated in the STP based on SBR Technology. Treated water will be reused for flushing, gardening and cooling of DG Sets. STP design proposed to be installed is attached as Annexure-VII .
2.	The Project Proponent would devise a monitoring plan to the satisfaction of the State Pollution Control Board to continuously monitor the treated waste water being used for flushing in terms of faecal coli forms and other pathogenic bacteria.	Agreed and Noted. Online automatic monitoring system (Connected to Haryana State Pollution Control Board server) will be installed during operational phase of the project to continuously monitor the treated waste parameters as per the outlet parameters of STP. Detailed management plan will be submitted during operational phase of the project for use of treated waste water for flushing in terms of Faecal coli forms and other Pathogenic bacteria will be prepared.
3.	The Project Proponents would commission a third party study on the implementation of conditions related to quality and quantity of recycle and reuse of treated water, efficiency of treatment systems, quality of treated water being supplied for flushing (specially the bacterial counts), comparative bacteriological studies from toilet seats using recycled treated waters and fresh waters for flushing, and quality of water being supplied through spray faucets attached to toilet seats.	Agreed & Noted. The adequacy of the STP will be checked by the independent third-party expert during Operation phase of the project. It will be ensured after installation and commissioning of the STP.

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

4.	Separate wet and dry bins must be provided in each unit and at ground level for facilitating segregation of waste. Solid Waste shall be segregated into wet garbage and inert materials. Wet Garbage shall be composted in Organic waste convertor. Adequate area shall be provided for solid waste management within the premises which will include area for segregation, composting. The Inert waste from the project will be sent to dumping site.	Project is still in construction phase. There is provision of separate wet and dry bins for segregation of waste. Separate wet and dry bins will be provided when the project is in operational phase. Organic waste convertor is proposed for the purpose of composting wet garbage. Adequate area has already been provided for solid waste management which includes separate area for segregation and composting.
5.	Traffic management plan as submitted shall be implemented in letter and spirit. Apart, a detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is marinated and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habilitation being carried out or purpose to be carried out by the project or other agencies in this 05kms radius of the site in different scenarios of space and time	Agreed and Noted. Traffic management plan has been already submitted to SEIAA, Haryana during process of Environmental Clearance. Traffic management plan has been enclosed as Annexure- VIII
6.	The PP is required to plant 10 times trees at the project site and compensatory tree plantation will be done @1:10. No tree cutting has been proposed in the instant project. A minimum of 1 tree for every 80 sqm of land should be planted and maintained. The Existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping. As proposed 2423.82 sqm (21%) shall be provided for green area development.	No tree felling has been done at the project site. Total 2423.82 sqm (approx. 21 % of Total plot area) will be developed as green belt. Native species would be preferred having heavy foliage, broad leaves and wide canopy cover.
7.	The Project Proponent shall obtain all necessary clearance/permission from all relevant agencies including town planning authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.	We would obtain all the necessary clearances/ permission from all the concerned departments in due course of time. Listed below are the clearances we have already obtained as the construction is in its final stage - Environmental Clearance, - Consent to Establish, - Aravali NOC, - Renewal of License from Directorate of Town & Country Planning, Haryana - Intekaal Letter

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

		vi. AAI NOC Copies of these permissions/clearances are attached as Annexure I, II, III, IV, V & VI respectively.
8.	The PP shall install the Eco Friendly Green Transformer based on ester oil to reduce the carbon foot print. The PP shall shift to gas based generator set when the gas is available. The PP shall install APCM for the DG set. The PP shall reduce the SO ₂ load by 30% if HSD is used.	Agreed & Noted. All the APCM will be installed for DG Sets. Detailed plan will be submitted in due course of time. HSD Bill is enclosed as Annexure- XXVII
9.	The PP shall increase use of solar power upto 5% of total power demand.	The project is in construction phase. Detailed design report for use of solar power will be submitted in due course of time.
10.	Consent to establish/operate for the expansion project shall be obtained from the State Pollution Control Board as required under the Air (Prevention and Control of pollution) Act, 1981 and the Water (Prevention and control of pollution) Act, 1974.	We have obtained Consent to Establish for the construction of the project. The Copy of the CTE issued by HSPCB vide CTE order no. HSPCB/Consent/ : 329962320GUNOCTE7324277 Dated 3/02/2020 is attached for your reference as Annexure-II .
11.	The Approval of the Competent Authority shall be obtained for structural safety of building code due to earthquakes, adequacy of firefighting equipment etc. as per National Building Code including protection measures from lightening etc.	We are in process for getting all statutory clearance from concerned department, which will be obtained and submitted in due course of time.
12.	The PP shall not carry any construction above or below the Revenue Rasta, if any.	Noted & Agreed
13.	The PP shall not carry any construction below the HT Line passing through the project, if any.	Noted & Agreed
14.	The PP shall obtain the Fire NOC from the Competent Authority before taking occupation of the building.	We are in process for getting all statutory clearance from concerned department, which will be obtained and submitted in due course of time. We will obtain Fire NOC from Fire Department.
15.	The PP shall not give occupation or possession before the water supply and sewage connection permitted by the competent authority.	Noted & Agreed
16.	The PP shall not give occupation or possession before the electricity connection permitted by the competent Authority.	Noted & Agreed Approval for electricity connection at construction phase is enclosed as Annexure- XXIX .
17.	The PP shall obtain the permission regarding withdrawal of ground water from CGWA before the start of the project and also obtained the CTO from HSPCB after the approval from CGWA.	Noted. No ground water will be used during construction/ operation phase of the project without prior permission. Permission from CGWA will be taken in case of abstraction of ground water. CTO will be obtained from HSPCB after completion of construction.
18.	The PP shall carry out the quarterly awareness programs for the stakeholders of	Agreed & Noted.

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

	the commercial colony/project.	Awareness/Training program was organized at the project site.
19.	03 Rain water harvesting recharge pits shall be provided for ground water recharging as per the CGWB norms.	Noted & Agreed
20.	The PP shall ensure the compliance of provisions of Plastic Waste Management (Amendment) Rules, 2022 relevant for the project.	Waste management plan for construction and operation phase of the project has been prepared and submitted during Environmental Clearance. Detailed waste management plan, solid waste, e-waste, and Plastic waste is attached as Annexure-IX .
21.	The PP may provide electric charging stations to facilitate electric vehicle commuters.	Noted & Agreed
22.	The PP shall increase the capacity of STP already installed.	Noted
23.	The PP shall submit the time schedule of Green Area Development, plantation, STP, OWC, RWH.	Noted & will be complied
24.	The PP shall install Digital water level recorder for monitoring the water recharge and carry out quarterly maintenance and cleaning of RWH pits.	Noted & Agreed
25.	The PP shall take all preventive measures including water sprinkles to control dust during construction and operational phase.	Noted & Agreed Currently project is in construction phase. Water sprinkling is being done by using perforated pipe attached with the water tankers and manually. It is being used at the project site for dust suppression. Current photograph of site is enclosed as Annexure- XXVIII .
26.	Any change in stipulations of EC will lead to Environment Clearance void-ab-initio and PP will have to seek fresh Environment Clearance.	Noted & Agreed
B. Statutory Compliance:		
1.	The project proponent shall obtain all necessary clearance/ permission from all relevant agencies including town planning authority for ground coverage, FAR and should be in accordance with zoning plan approved by Competent Authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.	Noted & Agreed All the construction is being done in accordance with the local building byelaws. We would obtain all the necessary clearances/ permission from all the concerned departments in due course of time. Listed below are the clearances we have already obtained as the construction is in its final stage i. Environmental Clearance, ii. Consent to Establish, iii. Aravali NOC, iv. Renewal of License from Directorate of Town & Country Planning, Haryana v. Intekaal Letter

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

		vi. AAI NOC Copies of these permissions/clearances are attached as Annexure I, II, III, IV, V & VI respectively.
2.	The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc as per National Building Code including protection measures from lightening etc.	Structure Stability certificate is enclosed as Annexure- XXX .
3.	The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.	We are in process for getting all statutory clearance from concerned department, which will be obtained and submitted in due course of time.
4.	The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.	Not Applicable
5.	The project proponent shall obtain Consent to Establish/Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Haryana State Pollution Control Board.	Copy of consent to establishment granted by Haryana State Pollution control Board, vid. Ref No. HSPCB/Consent/ : 329962320GUNOCTE7324277 Dated 3/02/2020 is attached as Annexure-II .
6.	The project proponent shall obtain the necessary permission for drawl of ground water /surface water required for the project from the competent authority.	Agreed and Noted In case of ground water abstraction prior approval from the competent authority will be taken.
7.	A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.	Noted
8.	All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.	We are in process for getting all statutory clearance from concerned department, which will be obtained and submitted in due course of time.
9.	The provisions of the Solid Waste (Management) Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste (Management) Rules, 2016 shall be followed.	Storage and disposal of Solid Waste, E-Waste and Plastic Waste generated at project site will be as per Solid Waste (Management) Rules, 2016, E-Waste (Management) Rules, 2016, and the Plastics Waste (Management) Rules, 2016.
10.	The project proponent shall follow the ECBC Act/ECBC-Rules prescribed by Bureau of Energy Efficiency, Ministry of Power strictly in addition of bylaws of the State Government.	This condition will be complied. As we are in construction stage of the project. We will submit the detailed ECBC plan in due course of time

I. Air Quality Monitoring and Preservation

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

I.	Notification GSR 94(E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation Measures for Construction and Demolition Activities for projects requiring Environmental Clearance shall be complied with.	Construction site has been adequately barricaded by Wind Breaking wall of 10m height for dust control. Photograph of wind breaking wall is enclosed as Annexure- XXIII Unpaved surfaces are being adequately sprinkled with water to suppress dust. Anti-smog gun is being used to reduce air pollution by spraying atomized water into the atmosphere to settle dust and other suspended particles. Photograph of anti-smog gun is enclosed as Annexure- X
II.	A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site.	Regular Monitoring, as per the statutory requirements of Ambient Noise and Ambient Air Quality will be conducted.
III.	The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g. PM10 and PM2.5) covering upwind and downwind directions during the construction period.	Agreed and Noted. For Continuous monitoring of PM10 & PM2.5 level at the project site, online AAQ monitoring system will be installed in upwind and downwind direction.
IV.	Diesel power generating sets proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of ultra low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board.	DG sets used as a source of power backup is as per the rules made under the Environment (Protection) Act, 1986 and the height of stack of DG sets is as per norms.
V.	Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building under construction, continuous dust/ wind breaking walls all around the site (at least 3 meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murram and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site.	Construction site has been adequately barricaded by Wind Breaking wall of 10m height for dust control. Unpaved surfaces are being adequately sprinkled with water to suppress dust. Anti-smog gun is being used to reduce air pollution by spraying atomized water into the atmosphere to settle dust and other suspended particles. Photograph of anti-smog gun is enclosed as Annexure- X
VI.	Sand, murram, loose soil, cement, stored on site shall be covered adequately to prevent dust pollution.	Construction site has been adequately barricaded by Wind Breaking wall of 10m height for dust control. Unpaved surfaces are being adequately sprinkled with water to suppress dust. Anti-smog gun is being used to reduce air pollution by spraying atomized water into the atmosphere to settle dust and other suspended particles.

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

VII.	Wet jet shall be provided for grinding and stone cutting.	Agreed & Noted.
VIII.	Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust.	Unpaved surfaces are being adequately sprinkled with water to suppress dust.
IX.	All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Rules 2016.	C&D Waste generated at project site during construction work have been given to Municipal Corporation Gurugram. Bill for lifting of Construction waste at site is attached as Annexure XI . Mask has been provided to all construction workers for protection from the dust.
X.	The diesel generator sets to be used during construction phase shall be ultra low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards.	Noted & complied
XI.	The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Ultra low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.	DG sets used are operated on low Sulphur Diesel. All the necessary measures have been to mitigate the impact of DG on Environment. The stack height is maintained as per CPCB standards and acoustic enclosure is provided to mitigate the noise pollution.
XII.	For indoor air quality the ventilation provisions as per National Building Code of India.	Noted & Agreed To maintain indoor air quality the ventilation provisions is followed as per NBC.
II. Water Quality Monitoring and Preservation		
I.	The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.	This condition will be complied. Topographical survey has already been done to maintain the natural unrestricted flow of water, when required. No natural drainage is available at the site.
II.	Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.	The building plan has been prepared as per National Building Code and Haryana State Building By-laws considering the natural drain system, natural topography to avoid cutting and filling to the maximum extent.
III.	Total fresh water use shall not exceed the proposed requirement as provided in the project details. The per capita supply should adhere to NBC 2016 and CGWA Notification dated 12.12.2018.	Noted & Agreed
IV.	The quantity of fresh water usage, water	Noted & Agreed

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

	recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.	Fresh water requirement is met through GMDA and the record of fresh water and recycled water usage will be submitted with six monthly monitoring report. Water balance is enclosed as Annexure- XII .
V.	A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users.	Noted & Agreed Water assurance letter for water supply from GMDA (Gurugram Metropolitan Development Authority) has been obtained. Copy of assurance Letter is attached as Annexure-XIII .
VI.	At least 20% of the open spaces as required by the local building bye-laws shall be pervious. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as pervious surface.	Total 2423.82 sqm (approx. 21 % of Total plot area) will be developed as green belt. Native species would be preferred having heavy foliage, broad leaves and wide canopy cover.
VII.	Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.	Dual plumbing system has already been taken into consideration. Water Balance showing use of treated water is attached as Annexure-XII for your reference.
VIII.	Use of water saving devices/ fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc) for water conservation shall be incorporated in the building plan.	Noted & Agreed Water saving fixtures such as low flow flushing systems has been incorporated for water conservation.
IX.	Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.	Dual plumbing system has already been taken into consideration. Water Balance showing use of treated water is attached as Annexure-XII for your reference.
X.	Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.	Ready Mix Concrete is being used to reduce water demand for Construction work. Copy of Purchase bills of RMC is attached as Annexure XIV .
XI.	The local bye-law provisions on rain water harvesting should be followed. If local byelaw provision is not available, adequate provision for storage and recharge should be followed as per the	We have proposed 03 nos. of rain water harvesting recharge pits for rain water harvesting. We have considered all the design criteria of local authority and CGWB. Detail of RWH is attached as Annexure-XV .

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

	Ministry of Urban Development Model Building Byelaws, 2016. Rain Water Harvesting pits shall be provided for ground water recharging as per the CGWB norms.	
XII.	A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meters of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority.	We have proposed 03 nos. of rain water harvesting recharge pits for rain water harvesting. We have considered all the design criteria of local authority and CGWB. Detail of RWH is attached as Annexure-XV .
XIII.	All recharge should be limited to shallow aquifer.	Noted
XIV.	No ground water shall be used during construction phase of the project.	No ground water is being used for the construction purpose in the project. STP treated water is being used for construction purpose. Copy of STP treated water tanker bill is attached as Annexure-XVI .
XV.	Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.	Noted. No ground water will be used during construction/ operation phase of the project without prior permission.
XVI.	The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.	Fresh water requirement is met through GMDA and the record of fresh water and recycled water usage will be submitted with six monthly monitoring report.
XVII.	Sewage shall be treated in the STP with tertiary treatment. The treated effluent from STP shall be recycled/re-used for flushing, AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.	This condition will be complied. STP with tertiary treatment i.e., Ultra-Filtration will be installed. Project is designed on Zero Liquid Discharge (ZLD). So, all the treated effluent from STP will be recycled/re-used for flushing and horticulture. So, there will not be any discharge of treated effluent/untreated effluents in to public sewer.
XVIII.	No sewage or untreated effluent water would be discharged through storm water drains.	Shall be complied
XIX.	Onsite sewage treatment of capacity of treating 100% waste water to be	Onsite STP facility will be installed and certified by an independent expert and accordingly report

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

	installed. The installation of the Sewage Treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation. Treated waste water shall be reused on site for landscape, flushing, cooling tower, and other end-uses. Excess treated water shall be discharged as per statutory norms notified by Ministry of Environment, Forest and Climate Change. Natural treatment systems shall be promoted.	will be submitted to the Ministry before commencement of operational phase of the project. Treated waste water will be reused for landscape, flushing, cooling tower and for other purposes.
XX.	Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problem from STP.	Noted the condition. The Periodical monitoring of sewage will also be conducted once the project comes under the operational phase.
XXI.	Sludge from the onsite sewage treatment, including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.	This condition will be complied. Sludge will be collected, conveyed and disposed as per Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.
III. Noise Monitoring and Prevention		
i.	Ambient noise levels shall conform to residential area/commercial area both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB / SPCB.	Regular Monitoring, as per the statutory requirements of Ambient Noise and Ambient Air Quality will be conducted. AAQ and Ambient Noise Monitoring report is attached as Annexure-XVII .
ii.	Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six monthly compliance report.	Agreed. Noise monitoring report has been attached as Annexure-XVII .
iii.	Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.	Adequate stack height as per CPCB standards will be provided for the DG sets during Operation Phase. DG Set will be acoustically enclosed for noise control.

IV. Energy Conservation Measures		
I.	Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency as per ECBC Act, 2017 read with ECBC Rules, 2018 shall be ensured. Buildings in the States which have notified their own ECBC, shall comply with the State ECBC also which is in no case should be less than 25% as prescribed.	The condition shall be complied. As we are in construction stage of the project. We will submit the detailed ECBC plan in due course of time.
II.	Outdoor and common area lighting shall be LED.	Noted & Agreed
III.	Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof R & U-values shall be as per ECBC specifications.	This condition will be complied. As we are in construction stage of the project. We will submit the detailed ECBC plan in due course of time.
IV.	Energy conservation measures like installation of CFLs/LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.	The condition shall be complied. As we are in construction stage of the project. We will submit the detailed ECBC plan in due course of time. The E-Waste (Management) Rules, 2016 will be followed for disposal of Used CFLs, TFL and LED during Construction and Operation Phase. An agreement will be made with authorized vendor for safe handling and disposal of E-waste.
V.	Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/ local building bye-laws requirement, whichever is higher.	The condition shall be complied. Detailed plan for Energy Conservation Plan as per ECBC 2017 will be submitted during operation phase of the project.
VI.	Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.	This condition shall be complied as project is in construction phase.
VII.	The PP will submit report indicating	Noted & Agreed

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

	compliance of each parameter of ECBC requirement and submit quantification saving report for each component.	
V. Waste Management		
I.	A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained.	Municipal Solid Wastes is being managed by Municipal corporation Gurgaon (MCG).
II.	Disposal of muck during construction phase shall not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.	All Construction and demolition (C&D) waste is being disposed by Municipal Corporation Gurgaon (MCG). Copy of receipt of C&D disposal from MCG is attached as Annexure-XI .
III.	Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials.	Detailed waste management plan is prepared. Waste management plan is attached as Annexure-XVIII .
IV.	Organic Waste Converter within the premises with a minimum capacity of 0.5 kg /person/day must be installed. Leaves to be put in earmarked pits for converting them into compost to be used as manure.	Noted Organic waste convertor will be installed in operational phase.
V.	All non-biodegradable waste shall be handed over to authorized recyclers for which a written tie up must be done with the authorized recyclers.	Non-Biodegradable waste will be handed over to authorized recyclers and agreement will be done with the recyclers during the operational phase of project.
VI.	Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.	Hazardous waste generated during construction phase, will be disposed off as per hazardous waste management rule, 2016.
VII.	Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly Ash Lime Gypsum blocks, Compressed earth blocks, and other environment friendly materials.	Agreed & Noted Environment friendly materials have been used during the construction phase such as AACs AAC Block bills is enclosed as Annexure-XIX .

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

VIII.	Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction.	Environment friendly AACs block are being used as construction material. Copy of Purchase bills is attached as Annexure-XIX . Ready mixed concrete is being used in building construction. Copy of RMC bills is attached as Annexure-XIV .
IX.	Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Rules, 2016.	All Construction and demolition (C&D) waste is being disposed by Municipal Corporation Gurgaon (MCG). Copy of receipt of C&D disposal from MCG is attached as Annexure-XI .
X.	Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/ rules of the regulatory authority to avoid mercury contamination.	Agreed & Noted. Used CFLs and TFLs will be properly collected and sent to authorized recyclers for recycling as per E-waste (Management) Rules, 2016.
Green Cover		
I.	No tree can be felled/transplant unless exigencies demand. Where absolutely necessary, tree felling shall be with prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (planted).	The project site was vacant land and devoid of trees at the time of start of construction. Hence, permission regarding Tree Felling from the Forest Department is not applicable.
II.	A minimum of 1 tree (5' tall) for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping.	The condition shall be complied. Landscape Plan attached for your reference as Annexure-XX .
III.	Where the trees need to be cut with prior permission from the concerned local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per	Noted & Agreed.

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

	the details provided in the project document.	
IV.	Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.	Noted and complied. Photograph showing excavated top soil is enclosed as Annexure XXIV .
VII. Transport		
I.	A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria. a) Hierarchy of roads with proper segregation of vehicular and pedestrian traffic. b) Traffic calming measures. c) Proper design of entry and exit points. d) Parking norms as per local regulation.	Shall be complied
II.	Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.	All vehicles hired for construction site have valid PUC certificates and abide by all the rules and regulations. PUC certificate is enclosed as Annexure- XXV
III.	A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State	Noted

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

	Urban Development department and the P.W.D./ competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.	
VIII. Human Health Issues		
I.	All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.	C&D Waste generated at project site during construction work have been given to Municipal Corporation Gurugram. Masks has been provided to all construction workers for protection from the dust.
II.	For indoor air quality the ventilation provisions as per National Building Code of India.	Noted & Agreed To maintain indoor air quality the ventilation provisions is followed as per NBC.
III.	Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.	Shall be complied
IV.	Provision shall be made for the housing of construction labor within the site with all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.	Local laborers have been procured for construction. Basic amenities like Mobile toilets, safe drinking water have been provided to laborers.
V.	Occupational health surveillance of the workers shall be done on a regular basis.	Agreed & complied.
VI.	A First Aid Room shall be provided in the project both during construction and operations of the project.	First aid facility has been provided at the construction site and will also be provided during operational phase of the project as well. Photograph of basic amenities provided is enclosed as Annexure- XXVI
IX. Corporate Environment Responsibility		
I.	The project proponent shall comply with the provisions as applicable, regarding Corporate Environment Responsibility.	Agreed.
II.	The company shall have a well laid down environmental policy duly approved by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and	Noted the condition.

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

	balances and to bring into focus any infringements/ deviation/ violation of the environmental/ forest/ wildlife norms/ conditions. The company shall have defined system of reporting infringements/ deviation/ violation of the environmental/ forest/ wildlife norms/ conditions and/ or shareholders/ stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report.	
III.	A separate Environmental Cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly to the head of the organization.	A separate Environmental Cell as required will be made during the operational phase of the project.
IV.	Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.	Shall be complied.
X. Miscellaneous		
I.	The project proponent shall prominently advertise it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days indicating that the project has been accorded environment clearance and the details of MoEFCC/SEIAA website where it is displayed.	Agreed and complied Copies of Newspaper advertisement is enclosed as Annexure-XXI .
II.	The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.	Noted & Complied
III.	The project proponent shall upload the	Noted

	status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.	Receiving of half yearly compliance report submitted in Dec 2022 has been attached as Annexure- XXII
IV.	The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.	Noted. Six monthly reports on compliance of EC conditions are being submitted on the website of MoEF
V.	The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.	Shall be complied.
VI.	The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.	Noted
VII.	The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.	Noted. All the stipulations made by SPCB will be strictly followed.
VIII.	The project proponent shall abide by all the commitments and recommendations made in the form-IA, Conceptual Plan and also that during their presentation to the Expert Appraisal Committee.	Noted & will be complied
IX.	No further expansion or modifications in the plan shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC)/SEIAA, Haryana. The project proponent shall seek fresh environmental clearance under EIA notification 2006 if at any stage there is change of area of this project.	Noted No further expansion or modification in the plan will be carried out without prior approval from MoEF
X.	Any change in planning of the approved plan will leads to Environment Clearance void-ab-initio and PP will have to seek fresh	Noted

by M/s. Asthetic Township Developers Pvt. Ltd.**

	Environment Clearance.	
XI.	The PP should give unambiguous affidavit giving land promoters in accordance with your ownership and possession of land legal the case referred for Environment Clearance to SEIAA.	Noted
XII.	Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.	Noted & Agreed
XIII.	The Ministry/SEIAA may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.	Noted
XIV.	The Ministry/SEIAA reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.	Noted
XV.	The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.	Noted
XVI.	The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Trans boundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.	Noted & Agreed.
XVII.	The validity of this environment clearance letter is valid up to 10 years from the date of issuance of EC letter in accordance with the MoEF & CC, GoI Notification No. S.O.1807 (E), dated the 12th April, 2022. The	Noted & Agreed.

**Expansion of Commercial Complex Project at Sushant Lok, Sector-27, Gurugram Haryana
by M/s. Asthetic Township Developers Pvt. Ltd.**

	environment clearance conditions applicable till life space project will continue to apply. In case of violation the action would be taken as per the laid down law of land. Compliance report should be sent to this office till life of the project.	
VIII.	If project is not completed within the validity period then the project proponent shall submit the application for extension of validity within one month before the lapse of validity period of Environment Clearance i.e. 10 years.	Noted & Agreed.
XIX.	The Project Proponent should intimate to the Authority as well as to the quarter concerned in case of any change in the present communication address.	Noted & Agreed In case of any change in the address prior intimation will be done to the Authority.

Annexure-I
Environment Clearance Letter

Government of India
Ministry of Environment, Forest and Climate Change
(Issued by the State Environment Impact Assessment
Authority(SEIAA), Haryana)

To,

The Chief Project
 ASTHETIC TOWNSHIP DEVELOPERS PRIVATE LIMITED
 Reg. Office 262, DDA Office Complex, Jhandewala Ext., New Delhi
 110055 -110055

Subject: Grant of Environmental Clearance (EC) to the proposed Project Activity
 under the provision of EIA Notification 2006-regarding

Sir/Madam,

This is in reference to your application for Environmental Clearance (EC)
 in respect of project submitted to the SEIAA vide proposal number
 SIA/HR/MIS/276205/2022 dated 03 Jun 2022. The particulars of the environmental
 clearance granted to the project are as below.

- | | |
|---|---|
| 1. EC Identification No. | EC22B038HR138582 |
| 2. File No. | SEIAA/HR/2022/199 |
| 3. Project Type | Expansion |
| 4. Category | B2 |
| 5. Project/Activity including
Schedule No. | 8(a) Building and Construction projects |
| 6. Name of Project | Expansion of Commercial Complex
Project at Sushant Lok, Sector-27,
Gurugram Haryana |
| 7. Name of Company/Organization | ASTHETIC TOWNSHIP DEVELOPERS
PRIVATE LIMITED |
| 8. Location of Project | Haryana |
| 9. TOR Date | N/A |

The project details along with terms and conditions are appended herewith from page
 no 2 onwards.

Date: 17/11/2022

(e-signed)
 Pardeep Kumar, IAS
 Member Secretary
 SEIAA - (Haryana)

*Note: A valid environmental clearance shall be one that has EC identification
 number & E-Sign generated from PARIVESH. Please quote identification
 number in all future correspondence.*

Subject: EC for Expansion of Commercial Complex Project at Sushant Lok, Sector 27, Sushant Lok-1, Gurugram, Haryana by M/s Asthetic Township Developers Private Limited.

1. This has reference to your Proposal No. SIA/HR/MIS/276205/2022 dated 03.06.2022 and subsequent letter dated 22.08.2022 for obtaining Environmental Clearance under category 8(a) of EIA Notification dated 14.09.2006 along with submission of required Scrutiny Fee amounting of Rs. 2,00,000/- vide DD No. 844061 dated 02.06.2022 in compliance of Haryana Government, Environment & Climate Change Notification No. DE&CCH/3060 dated 14th October, 2021. The proposal has been appraised as per prescribed procedure in the light of provisions under the EIA Notification, 2006 on the basis of the mandatory documents enclosed with the application viz., Form-1, Form1-A, Conceptual Plan and additional clarifications furnished in response to the observations of the State Expert Appraisal Committee (SEAC) constituted by MoEF& CC, GoI vide their Notification dated 21.02.2022, in its meeting held on 08.07.2022, 22.08.2022 & 10.10.2022 awarded "Gold" rating / grading to the Project.
2. It is inter-alia, noted that the project involves the EC for Expansion of Commercial Complex Project at Sushant Lok, Sector 27, Gurugram, Haryana.
3. The details of project are as under:

Sr. No.	Particulars	Details as per previous EC	Details as per Proposed Expansion	Total

4. In view of the recommendations made by State Expert Appraisal Committee (SEAC) in the said case and further consideration of the documents/details submitted by the Project Proponent; the Authority after discussions decided during **149th Meeting held on 08.11.2022** to **"GRANT ENVIRONMENT CLEARANCE" TO THE PROJECT, UNDER CATEGORY 8(a) OF EIA NOTIFICATION, 2006,** subject to the conditions listed below:

*PP is required to submit an Affidavit that **"no case(s) is/are pending before any Court relating to the Project"** within 15 days, positively, from the date of Grant of Environment Clearance. Failure to comply with the same will lead to withdrawal of Environment Clearance Granted to the Project":-*

A. Specific Conditions:-

1. Sewage shall be treated in the STP based on latest Technology with tertiary treatment i.e. Ultra Filtration to achieve standards ordered by NGT. The Treated effluent from STP shall be recycled /reused for flushing, DG cooling and Gardening. The dimension of each component of STP should be properly designed as per Norms.
2. The Project Proponent would devise a monitoring plan to the satisfaction of the State Pollution Control Board so as to continuously monitor the treated waste water being used for flushing in terms of faecal coli forms and other pathogenic bacteria.
3. The Project Proponents would commission a third party study on the implementation of conditions related to quality and quantity of recycle and reuse of treated water, efficiency of treatment systems, quality of treated water being supplied for flushing (specially the bacterial counts), comparative bacteriological studies from toilet seats using recycled treated waters and fresh waters for flushing, and quality of water being supplied through spray faucets attached to toilet seats.
4. Separate wet and dry bins must be provided in each unit and at ground level for facilitating segregation of waste. Solid Waste shall be segregated into wet garbage and inert materials. Wet Garbage shall be composted in Organic waste convertor. Adequate area shall be provided for solid waste management within

the premises which will include area for segregation, composting. The Inert waste from the project will be sent to dumping site.

5. Traffic management plan as submitted shall be implemented in letter and spirit. Apart, a detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habilitation being carried out or purpose to be carried out by the project or other agencies in this 05kms radius of the site in different scenarios of space and time
6. The PP is required to plant 10 times trees at the project site and compensatory tree plantation will be done @ 1:10. No tree cutting has been proposed in the instant project. A minimum of 1 tree for every 80 sqm of land should be planted and maintained. The Existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping. As proposed **2423.82 sqm (21%)** shall be provided for green area development.
7. The Project Proponent shall obtain all necessary clearance/permission from all relevant agencies including town planning authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.
8. The PP shall install the Eco Friendly Green Transformer based on ester oil to reduce the carbon foot print. The PP shall shift to gas based generator set when the gas is available. The PP shall install APCM for the DG set. The PP shall reduce the SO₂ load by 30% if HSD is used
9. The PP shall increase use of solar power upto 5% of total power demand.
10. Consent to establish/operate for the expansion project shall be obtained from the State Pollution Control Board as required under the Air (Prevention and Control of pollution) Act, 1981 and the Water (Prevention and control of pollution) Act, 1974.
11. The Approval of the Competent Authority shall be obtained for structural safety of building code due to earthquakes, adequacy of fire fighting equipments etc. as per National Building Code including protection measures from lightning etc.
12. The PP shall not carry any construction above or below the Revenue Rasta, if any
13. The PP shall not carry any construction below the HT Line passing through the project, if any.
14. The PP shall obtain the Fire NOC from the Competent Authority before taking occupation of the building.
15. The PP shall not give occupation or possession before the water supply and sewage connection permitted by the competent authority.
16. The PP shall not give occupation or possession before the electricity connection permitted by the competent Authority.
17. The PP shall obtain the permission regarding withdrawal of ground water from CGWA before the start of the project and also obtained the CTO from HSPCB after the approval from CGWA.
18. The PP shall carry out the quarterly awareness programs for the stakeholders of the commercial colony/project.
19. **03 Rain water harvesting recharge pits** shall be provided for ground water recharging as per the CGWB norms.
20. The PP shall ensure the compliance of provisions of Plastic Waste Management (Amendment) Rules, 2022 relevant for the project.
21. The PP may provide electric charging stations to facilitate electric vehicle commuters.
22. The PP shall increase the capacity of STP already installed
23. The PP shall submit the time schedule of Green Area Development, plantation, STP, OWC, RWH.
24. The PP shall install Digital water level recorder for monitoring the water recharge and carry out quarterly maintenance and cleaning of RWH pits.

25. The PP shall take all preventive measures including water sprinkles to control dust during construction and operational phase.
26. Any change in stipulations of EC will lead to Environment Clearance void-ab-initio and PP will have to seek fresh Environment Clearance.

B. Statutory Compliance:

- [1] The project proponent shall obtain all necessary clearance/ permission from all relevant agencies including town planning authority for ground coverage, FAR and should be in accordance with zoning plan approved by Competent Authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.
- [2] The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc as per National Building Code including protection measures from lightening etc.
- [3] The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
- [4] The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
- [5] The project proponent shall obtain Consent to Establish/Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Haryana State Pollution Control Board.
- [6] The project proponent shall obtain the necessary permission for drawl of ground water /surface water required for the project from the competent authority.
- [7] A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.
- [8] All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.
- [9] The provisions of the Solid Waste (Management) Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste (Management) Rules, 2016 shall be followed.
- [10] The project proponent shall follow the ECBC Act/ECBC-Rules prescribed by Bureau of Energy Efficiency, Ministry of Power strictly in addition of bylaws of the State Government.

I. Air Quality Monitoring and Preservation

- i. Notification GSR 94(E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation Measures for Construction and Demolition Activities for projects requiring Environmental Clearance shall be complied with.
- ii. A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site.
- iii. The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g. PM₁₀ and PM_{2.5}) covering upwind and downwind directions during the construction period.
- iv. Diesel power generating sets proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of ultra low sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board.
- v. Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site. These measures shall include screens for the building

under construction, continuous dust/ wind breaking walls all around the site (at least 3 meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murrum and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site.

- vi. Sand, murrum, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution.
- vii. Wet jet shall be provided for grinding and stone cutting.
- viii. Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust.
- ix. All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Rules 2016.
- x. The diesel generator sets to be used during construction phase shall be ultra low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards.
- xi. The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Ultra low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.
- xii. For indoor air quality the ventilation provisions as per National Building Code of India.

II. Water Quality Monitoring and Preservation

- i. The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.
- ii. Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.
- iii. Total fresh water use shall not exceed the proposed requirement as provided in the project details. The per capita supply should adhere to NBC 2016 and CGWA Notification dated 12.12.2018.
- iv. The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
- v. A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users.
- vi. At least 20% of the open spaces as required by the local building bye-laws shall be pervious. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as pervious surface.
- vii. Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.
- viii. Use of water saving devices/ fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc) for water conservation shall be incorporated in the building plan.
- ix. Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.
- x. Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.

- xi. The local bye-law provisions on rain water harvesting should be followed. If local byelaw provision is not available, adequate provision for storage and recharge should be followed as per the Ministry of Urban Development Model Building Byelaws, 2016. Rain Water Harvesting pits shall be provided for ground water recharging as per the CGWB norms.
- xii. A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meters of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority.
- xiii. All recharge should be limited to shallow aquifer.
- xiv. No ground water shall be used during construction phase of the project.
- xv. Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.
- xvi. The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
- xvii. Sewage shall be treated in the STP with tertiary treatment. The treated effluent from STP shall be recycled/re-used for flushing, AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.
- xviii. No sewage or untreated effluent water would be discharged through storm water drains.
- xix. Onsite sewage treatment of capacity of treating 100% waste water to be installed. The installation of the Sewage Treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation. Treated waste water shall be reused on site for landscape, flushing, cooling tower, and other end-uses. Excess treated water shall be discharged as per statutory norms notified by Ministry of Environment, Forest and Climate Change. Natural treatment systems shall be promoted.
- xx. Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problem from STP.
- xxi. Sludge from the onsite sewage treatment, including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.

III. Noise Monitoring and Prevention

- i. Ambient noise levels shall conform to residential area/commercial area both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB / SPCB.
- ii. Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
- iii. Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.

IV. Energy Conservation Measures

- i. Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency as per ECBC Act, 2017 read with ECBC Rules, 2018 shall be

ensured. Buildings in the States which have notified their own ECBC, shall comply with the State ECBC also which is in no case should be less than 25% as prescribed.

- ii. Outdoor and common area lighting shall be LED.
- iii. Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof R & U-values shall be as per ECBC specifications.
- iv. Energy conservation measures like installation of CFLs/LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.
- v. Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/ local building bye-laws requirement, whichever is higher.
- vi. Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.
- vii. The PP will submit report indicating compliance of each parameter of ECBC requirement and submit quantification saving report for each component.

V. Waste Management

- i. A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained.
- ii. Disposal of muck during construction phase shall not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
- iii. Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials.
- iv. Organic Waste Converter within the premises with a minimum capacity of 0.5 kg /person/day must be installed. Leaves to be put in earmarked pits for converting them into compost to be used as manure.
- v. All non-biodegradable waste shall be handed over to authorized recyclers for which a written tie up must be done with the authorized recyclers.
- vi. Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.
- vii. Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly Ash Lime Gypsum blocks, Compressed earth blocks, and other environment friendly materials.
- viii. Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction.
- ix. Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Rules, 2016.
- x. Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/ rules of the regulatory authority to avoid mercury contamination.

VI. Green Cover

- i. No tree can be felled/transplant unless exigencies demand. Where absolutely necessary, tree felling shall be with prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (planted).
- ii. A minimum of 1 tree (5' tall) for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping.
- iii. Where the trees need to be cut with prior permission from the concerned local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document.
- iv. Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.

VII. Transport

- i. A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria.
 - a) Hierarchy of roads with proper segregation of vehicular and pedestrian traffic.
 - b) Traffic calming measures.
 - c) Proper design of entry and exit points.
 - d) Parking norms as per local regulation.
- ii. Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.
- iii. A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habitation being carried out or proposed to be carried out by the project or other agencies in this 05 Kms radius of the site in different scenarios of space and time and the traffic management plan shall be duly validated and certified by the State Urban Development department and the P.W.D./ competent authority for road augmentation and shall also have their consent to the implementation of components of the plan which involve the participation of these departments.

VIII. Human Health Issues

- i. All workers working at the construction site and involved in loading, unloading, carriage of construction material and construction debris or working in any area with dust pollution shall be provided with dust mask.
- ii. For indoor air quality the ventilation provisions as per National Building Code of India.
- iii. Emergency preparedness plan based on the Hazard identification and Risk Assessment (HIRA) and Disaster Management Plan shall be implemented.
- iv. Provision shall be made for the housing of construction labour within the site with

all necessary infrastructure and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structures to be removed after the completion of the project.

- v. Occupational health surveillance of the workers shall be done on a regular basis.
- vi. A First Aid Room shall be provided in the project both during construction and operations of the project.

IX. Corporate Environment Responsibility

- i. The project proponent shall comply with the provisions as applicable, regarding Corporate Environment Responsibility.
- ii. The company shall have a well laid down environmental policy duly approved by the Board of Directors. The environmental policy should prescribe for standard operating procedures to have proper checks and balances and to bring into focus any infringements/ deviation/ violation of the environmental/ forest/ wildlife norms/ conditions. The company shall have defined system of reporting infringements/ deviation/ violation of the environmental/ forest/ wildlife norms/ conditions and/ or shareholders/ stake holders. The copy of the board resolution in this regard shall be submitted to the MoEF&CC as a part of six-monthly report.
- iii. A separate Environmental Cell both at the project and company head quarter level, with qualified personnel shall be set up under the control of senior Executive, who will directly to the head of the organization.
- iv. Action plan for implementing EMP and environmental conditions along with responsibility matrix of the company shall be prepared and shall be duly approved by competent authority. The year wise funds earmarked for environmental protection measures shall be kept in separate account and not to be diverted for any other purpose. Year wise progress of implementation of action plan shall be reported to the Ministry/Regional Office along with the Six Monthly Compliance Report.

X. Miscellaneous

- i. The project proponent shall prominently advertise it at least in two local newspapers of the District or State, of which one shall be in the vernacular language within seven days indicating that the project has been accorded environment clearance and the details of MoEFCC/SEIAA website where it is displayed.
- ii. The copies of the environmental clearance shall be submitted by the project proponents to the Heads of local bodies, Panchayats and Municipal Bodies in addition to the relevant offices of the Government who in turn has to display the same for 30 days from the date of receipt.
- iii. The project proponent shall upload the status of compliance of the stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
- iv. The project proponent shall submit six-monthly reports on the status of the compliance of the stipulated environmental conditions on the website of the ministry of Environment, Forest and Climate Change at environment clearance portal.
- v. The project proponent shall submit the environmental statement for each financial year in Form-V to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently and put on the website of the company.

- vi. The project proponent shall inform the Regional Office as well as the Ministry, the date of financial closure and final approval of the project by the concerned authorities, commencing the land development work and start of production operation by the project.
- vii. The project authorities must strictly adhere to the stipulations made by the State Pollution Control Board and the State Government.
- viii. The project proponent shall abide by all the commitments and recommendations made in the form-IA, Conceptual Plan and also that during their presentation to the Expert Appraisal Committee.
- ix. No further expansion or modifications in the plan shall be carried out without prior approval of the Ministry of Environment, Forests and Climate Change (MoEF&CC)/SEIAA, Haryana. The project proponent shall seek fresh environmental clearance under EIA notification 2006 if at any stage there is change of area of this project.
- x. Any change in planning of the approved plan will leads to Environment Clearance void-ab-initio and PP will have to seek fresh Environment Clearance
- xi. The PP should give unambiguous affidavit giving land promoters in accordance with your ownership and possession of land legal the case referred for Environment Clearance to SEIAA.
- xii. Concealing factual data or submission of false/fabricated data may result in revocation of this environmental clearance and attract action under the provisions of Environment (Protection) Act, 1986.
- xiii. The Ministry/SEIAA may revoke or suspend the clearance, if implementation of any of the above conditions is not satisfactory.
- xiv. The Ministry/SEIAA reserves the right to stipulate additional conditions if found necessary. The Company in a time bound manner shall implement these conditions.
- xv. The Regional Office of this Ministry shall monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the officer (s) of the Regional Office by furnishing the requisite data / information/monitoring reports.
- xvi. The above conditions shall be enforced, inter-alia under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986, Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 and the Public Liability Insurance Act, 1991 along with their amendments and Rules and any other orders passed by the Hon'ble Supreme Court of India / High Courts and any other Court of Law relating to the subject matter.
- xvii. The validity of this environment clearance letter is valid up to 10 years from the date of issuance of EC letter in accordance with the MoEF & CC, GoI Notification No. S.O.1807 (E), dated the 12th April, 2022. The environment clearance conditions applicable till life space project will continue to apply. In case of violation the action would be taken as per the laid down law of land. Compliance report should be sent to this office till life of the project.

- xviii. If project is not completed within the validity period then the project proponent shall submit the application for extension of validity within one month before the lapse of validity period of Environment Clearance i.e. 10 years.
- xix. The Project Proponent should intimate to the Authority as well as to the quarter concerned in case of any change in the present communication address.

(Pardeep Kumar, IAS)
Member Secretary,
State Level Environment Impact
Assessment Authority, Haryana, Panchkula.

Annexure-II
Consent to Establish

**HARYANA STATE POLLUTION CONTROL
BOARD**

**Gurgaon North Vikas Sadan, 1st Floor, Near DC
Court, Gurgaon Ph.0124-2332775 Email:-**

hspcbrogrn@gmail.com

Website: www.hrocmmms.nic.in E-Mail - hspcbho@gmail.com

Telephone No.: 0172-2577870-73

No. HSPCB/Consent/ : 329962320GUNOCTE7324277

Dated:03/02/2020

To.

**M/s : Asthetic Township Developers Pvt Ltd
Commercial Complex at Sector 27 Gurugram
GURGAON
122009**

**Sub. : Grant of consent to Establish to M/s Asthetic Township Developers
Pvt Ltd**

Please refer to your application no. 7324277 received on dated 2020-01-27 in regional office Gurgaon North.

With reference to your above application for consent to establish, M/s Asthetic Township Developers Pvt Ltd is here by granted consent as per following specification/Terms and conditions.

Consent Under	AIR/WATER
Period of consent	03/02/2020 - 06/02/2026
Industry Type	Building and construction project having waste water generation more than 100 KLD
Category	RED
Investment(In Lakh)	30544.0
Total Land Area (Sq. meter)	11537.57
Total Builtup Area (Sq. meter)	71057.12
Quantity of effluent	
1. Trade	0.0 KL/Day
2. Domestic	131.0 KL/Day
Number of outlets	1.0
Mode of discharge	
1. Domestic	Reuse/Recycle
2. Trade	0
Permissible Domestic Effluent Parameters	
1. BOD	30 mg/l
2. COD	250 mg/l
3. TSS	100 mg/l

Permissible Trade Effluent Parameters	
1. NA	mg/l
Number of stacks	4
Height of stack	
1. DG Set (1500 KVA)	8 METER
2. DG Set (1500 KVA)	8 METER
3. DG Set (1500 KVA)	8 METER
4. DG Set (1000 KVA)	6 METER
Permissible Emission parameters	
1. NA	
Capacity of boiler	
1. NA	Ton/hr
Type of Furnace	
1. NA	
Type of Fuel	
1. Diesel	1.1 KL/day

Regional Officer, Gurgaon North

HARYANA STATE Haryana State Pollution Control Board
Terms and conditions

1. The industry has declared that the quantity of effluent shall be 131 KL/Day i.e 0KL/Day for Trade Effluent, 0 KL/Day for Cooling, 131 KL/Day for Domestic and the same should not exceed .
2. The above 'Consent to Establish' is valid for 60 months from the date of its issue to be extended for another one year at the discretion of the Board or till the time the unit starts its trial production whichever is earlier. The unit will have to set up the plant and obtain consent during this period.
3. The officer/official of the Board shall have the right to access and inspection of the industry in connection with the various processes and the treatment facilities being provided simultaneously with the construction of building/machinery. The effluent should conform the effluent standards as applicable
4. That necessary arrangement shall be made by the industry for the control of Air Pollution before commissioning the plant. The emitted pollutants will meet the emission and other standards as laid/will be prescribed by the Board from time to time.
5. The applicant will obtain consent under section 25/26 of the Water (Prevention & Control of Pollution) Act, 1974 and under section 21/22 of the Air (Prevention & Control of Pollution) Act, 1981 as amended to-date-even before starting trial production
6. The above Consent to Establish is further subject to the conditions that the unit complies with all the laws/rules/decisions and competent directions of the Board/Government and its functionaries in all respects before commissioning of the operation and during its actual working strictly.
7. No in-process or post-process objectionable emission or the effluent will be allowed, if the scheme furnished by the unit turns out to be defective in any actual experience
8. The Electricity Department will give only temporary connection and permanent connection to the unit will be given after verifying the consent granted by the Board, both under Water Act and Air Act.

9. Unit will raise the stack height of DG Set/Boiler as per Board's norms.
10. Unit will maintain proper logbook of Water meter/sub meter before/after commissioning.
11. That in the case of an industry or any other process the activity is located in an area approved and that in case the activity is sited in an residential or institutional or commercial or agricultural area, the necessary permission for siting such industry and process in an residential or institutional or commercial or agricultural area or controlled area under Town and Country Planning laws CLU or Municipal laws has to be obtained from the competent Authority in law permitting this deviation and be submitted in original with the request for consent to operate.
12. That there is no discharge directly or indirectly from the unit or the process into any interstate river or Yamuna River or River Ghaggar.
13. That the industry or the unit concerned is not sited within any prohibited distances according to the Environmental Laws and Rules, Notification, Orders and Policies of Central Pollution control Board and Haryana State Pollution Control Board.
14. That of the unit is discharging its sewage or trade effluent into the public sewer meant to receive trade effluent from industries etc. then the permission of the Competent Authority owing and operating such public sewer giving permission letter to his unit shall be submitted at time of consent to operate.
15. That if at any time, there is adverse report from any adjoining neighbor or any other aggrieved party or Municipal Committee or Zila Parishad or any other public body against the unit's pollution; the Consent to Establish so granted shall be revoked.
16. That all the financial dues required under the rules and policies of the Board have been deposited in full by the unit for this Consent to Establish.
17. In case of change of name from previous Consent to Establish granted, fresh Consent to Establish fee shall be levied.
18. Industry should adopt water conservation measures to ensure minimum consumption of water in their Process. Ground water based proposals of new industries should get clearance from Central Ground Water Authority for scientific development of previous resource.
19. That the unit will take all other clearances from concerned agencies, whenever required.
20. That the unit will not change its process without the prior permission of the Board.
21. That the Consent to Establish so granted will be invalid, if the unit falls in Aravali Area or non conforming area.
22. That the unit will comply with the Hazardous Waste Management Rules and will also make the non-leachate pit for storage of Hazardous waste and will undertake not to dispose off the same except for pit in their own premises or with the authorized disposal authority.
23. That the unit will submit an undertaking that it will comply with all the specific and general conditions as imposed in the above Consent to Establish within 30 days failing which Consent to Establish will be revoked.
24. That unit will obtain EIA from MoEF, if required at any stage.
25. In case of unit does not comply with the above conditions within the stipulated period, Consent to Establish will be revoked.
26. That unit will obtain consent to operate from the board before the start of product activity.

Specific Conditions

Other Conditions :

1. The project proponent will obtain all necessary clearances from all concerned departments. 2. Project proponent will not change the quantity of domestic effluent/trade effluent/air emission without prior permission of the Board. Project Proponent will obtain prior CTO before starting of production and apply for CTO/ CTE Extension at least 90 days before expiry date of this CTE. 3. Project Proponent will install STP/ETP/ACPM along with the main project. 4. Project Proponent will install adequate acoustic enclosures/chambers on their DG SETS with proper stack height as per prescribed norms to meet the prescribed standards under EP Rules. 5. Project Proponent will comply with the provisions of Water Act, 1974, Air Act, 1981, Solid Waste Management Rules, 2016, Hazardous & Other Waste Management Rules, 2016, Plastic Waste Management Rules, 2016, E-Waste Management Rules, 2016, Battery Managements Rules, C&D Waste Management Rules, 2016& amendments and other applicable environmental legislation. 6. Project Proponent will use only treated effluent supplied from Sewage treatment plant during construction phase of the project 7. That this CTE will not provide any relaxation /benefit from any other Act/Rules/Regulations applicable to the project/land in question. 8. Project Proponent will not discharge any type Treated or untreated effluent outside the premises of the project. 9. Project Proponent will not use in their DG set as a fuel i.e. pet coke, furnace oil and LSHS etc. 10. Stack emission level should be stringent than the existing standards in terms of the identified critical pollutants. 11. Effective fugitive emission control measures should be imposed in the process, transportation, parking etc. 12. Encourage use of cleaner fuels (pet coke / furnace oil /LSHS may be avoided). 13. Best available technology may be used. For example usage of EAF/SAF/IF in place of Cupola Furnace, Usage of Supercritical technology in place of sub – critical technology. 14. Increase of green belt cover by 40% of the total land area beyond the permissible requirement of 33%, wherever feasible. 15. Stipulation of greenbelt outside the project premises such as avenue plantation, plantation in vacant areas, social forestry etc. 16. Assessment of carrying capacity of transportation load on the roads inside the industrial premises. If the roads required to be widened, shall be prescribed as a condition. 17. Project Proponent will not discharge any type of effluent inside & outside of the premises of the project and reuse/recycle of treated waste water be ensured. 18. Continuous monitoring of emission and effluent quality / quantity to be installed & will connect the same with server of CPCB and HSPCB. 19. A detailed water harvesting plan may be submitted by the project proponent. 20. Project Proponent will achieve zero discharge and install latest technology of STP/ETP and reuse/recycle of treated effluent. 21. In case, domestic waste water generation is more than 10 KLD, the industry may install STP. 22. Dumping of waste (fly ash, slag, red mud etc.) may be permitted only at designated locations approved by SPCBs/PCCs. 23. More stringent norms for management of hazardous waste. The waste generated should be preferably utilized in co-processing. 24. Monitoring of compliance of EC conditions may be submitted with third party audit every year. 25. Project Proponent will dispose off their waste/spent oil of DG sets only to authorize recyclers by the HSPCB. 26. ORDERS

Whereas, License No. 97 of 2011 dated 09.11.2011 stands granted to Asthetic Township Developers Pvt. Ltd., APT No. E-602, Uniworld City, Sector 30, Gurugram for setting up of commercial colony over an area measuring 2.851 acres in Sector 27, Gurugram Manesar Urban Complex under the provisions of Haryana Development and Regulation of Urban Areas Act, 1975. As per terms and conditions of the licenses and of the agreement executed on LC-IV, the colonizer is required to comply with the provisions of the Haryana Development and Regulation of Urban Areas Act, 1975 and its Rules, 1976.

And, whereas, for delay in compliance of the provisions of Rule 24, 26(2), 27 & 28 of the Haryana Development and Regulation of Urban Areas Rules, 1976 upto 31.03.2019, the licensee has submitted a request for composition of said offence. As per the rates finalized by the Govt. the composition fee has worked out as Rs. 2,24,000/-. The company has deposited composition charges amounting Rs. 2,24,000/- through e-payment TCP3172519112750204 dated 27.11.2019.

Accordingly, in exercise of power conferred under Section-13(1) of the Haryana Development and Regulation of Urban Areas Act, 1975, I hereby order to compound the offence committed due to delay in compliance of above said Rules upto 31.03.2019.

AAI NOC

AAI/RH&NR/ATM/NOC/2019/117/527-530

M/s Asthetic Township Developers Pvt. Ltd.

262, DDA Office Complex, Jhandewalan
Extn, New Delhi-110055

भारतीय विमानपत्तन प्राधिकरण
AIRPORTS AUTHORITY OF INDIA

Date: 25-03-2019

Valid Upto: 24-03-2027

No Objection Certificate for Height Clearance

1. This NOC is issued by Airports Authority of India (AAI) in pursuance of responsibility conferred by and at per the provisions of Govt. of India (Ministry of Civil Aviation) order GSR731 (E) dated 30th Sep. 2015 for Safe and Regular Aircraft Operations.

2. This office has no objection to the construction of the proposed structure as per the following details:

NOC ID :	PALM/NORTH/B/030819/377136
Applicant Name*	Satyajit Singh
Site Address*	Proposed Commercial colony on site admeasuring 11537.57 Sq. Meter located at Sector-27, Rect No. 59, Village -Sukhrati, Gurugram, Haryana, Sukhrati, Gurgaon, Haryana
Site Coordinates*	77 04 26.27-28 27 57.54, 77 04 26.95-28 27 59.06, 77 04 26.98-28 27 55.15, 77 04 26.98-28 27 57.11, 77 04 29.45-28 27 57.08, 77 04 29.48-28 27 55.11, 77 04 30.08-28 27 57.91, 77 04 30.55-28 27 55.13, 77 04 31.77-28 27 59.03, 77 04 31.80-28 27 56.10
Site Elevation in mtrs AMSL as submitted by Applicant*	241.95 M
Permissible Top Elevation in mtrs Above Mean Sea Level(AMSL)	346.95M

*As provided by applicant

3. This NOC is subject to the terms and conditions as given below:

a. Permissible Top elevation has been issued on the basis of Site coordinates and Site Elevation submitted by Applicant. AAI neither owns the responsibility nor authenticates the correctness of the site coordinates & site elevation provided by the applicant. If at any stage it is established that the actual data is different, this NOC will stand null and void and action will be taken as per law. The office in-charge of the concerned aerodrome may initiate action under the Aircraft (Demolition of Obstruction caused by Buildings and Trees etc.) Rules, 1994"

b. The Site coordinates as provided by the applicant in the NOC application has been plotted on the street view map and satellite map as shown in ANNEXURE. Applicant/Owner to ensure that the plotted coordinates corresponds to his/her site. In case of any discrepancy Designated Officer shall be requested for cancellation of the NOC.

c. Airport operations officer/designated representative may visit the site (with prior coordination with applicant or owner) to ensure that NOC terms & conditions are complied with.

d. The Structure height (including any superstructure) shall be calculated by subtracting the Site elevation in AMSL from the Permissible Top Elevation in AMSL i.e. Maximum Structure Height - Permissible Top Elevation minus (-) Site Elevation.

e. The issue of the 'NOC' is further subject to the provisions of Section 9-A of the Indian Aircraft Act, 1934 and any notifications issued there under from time to time including the Aircraft (Demolition of Obstruction caused by Buildings and Trees etc.) Rules, 1994.

f. No radio/TV Antenna, lighting arresters, staircase, Minsite, Overhead water tank and attachments of fixtures of any kind shall project above the Permissible Top Elevation of 346.95M (AMSL), as indicated in para 2.

g. Use of oil, electric or any other fuel which does not create smoke hazard for flight operations is obligatory, within 8 EM of the Aerodrome Reference Point.

h. The certificate is valid for a period of 8 years from the date of its issue. One time revalidation without assessment may be allowed, provided construction work has commenced, subject to the condition that such request shall be made within the validity period of the NOC and the delay is due to circumstances which are beyond the control of the developer.

i. No light or a combination of lights which by reason of its intensity, configuration or colour may cause confusion with the aeronautical ground lights of the Airport shall be installed at the site at any time, during or after the construction of the building. No activity shall be allowed which may affect the safe operations of flights.

j. The applicant will not complain/claim compensation against aircraft noise, vibrations, damages etc. caused by aircraft operations at or in the vicinity of the airport.

k. Day markings & night lighting with secondary power supply shall be provided as per the guidelines specified in chapter 6 and appendix 6 of Civil Aviation Requirement Series B Part I Section 3, available on DGCA India website: www.dgca.nic.in

l. The applicant is responsible to obtain all other statutory clearances from the concerned authorities including the approval of building plans. This NOC for height clearances is to ensure the safe and regular aircraft operations and shall not be used as document for any other purpose/claim whatsoever, including ownership of land etc.

m. This NOC has been issued w.r.t. the Civil Airports. Applicant needs to seek separate NOC from Defence, if the site lies within their jurisdiction. Applicants also need to seek clearance from state Govt. as applicable, for sites which lies in the jurisdiction of unlicensed aerodrome as outlined in Rule 13 of GSR751 (E).

n. In case of any discrepancy/interpretation of NOC letter, English version shall be valid.

o. In case of any dispute w.r.t. site elevation and/or AGL height, top elevation in AMSL shall prevail.

Figure 2: Water Balance Diagram (Rainy Season)

Wastewater Generation & Treatment

It is expected that the project will generate approx. 131KLD of wastewater. The wastewater will be treated in onsite STP of 160 KL capacity. The treated effluent 118 KLD will be reused for flushing, horticulture, DG Cooling & HVAC.

2.2 What is the quality of water required, in case, the supply is not from a municipal source? (Provide physical, chemical, Biological characteristics with class of water quality).

The required water will be met through the HUDA. The total water requirement is approx. 337 KLD.

SBR TECHNOLOGY

Sewerage System

An external sewage network shall collect the sewage from all units, and flow by gravity to the proposed sewage treatment plant.

Following are the benefits of providing the Sewage Treatment Plant in the present circumstances:

- Reduced net daily water requirements, source for Horticultural purposes by utilization of the treated waste water.
- Reduced dependence on the public utilities for water supply and sewerage systems.
- Sludge generated from the Sewage Treatment Plant shall be rich in organic content and an excellent fertilizer for horticultural purposes.

a. Wastewater Details

(a)	Daily load	:	131 KLD
(b)	Duration of flow to STP	:	24 hours
(c)	Temperature	:	Maximum 46°C
(d)	pH	:	6.5 to 8.5
(e)	Colour	:	Mild
(f)	T.S.S. (mg/l)	:	300-400
(g)	BOD ₅ (mg/l)	:	250-350
(h)	COD (mg/l)	:	400-600
(i)	Oil & Grease	:	10-50
(j)	Color	:	Mild

b. Final discharge characteristics

(a)	pH	:	6.5 to 7.5
(b)	Oil & Grease	:	<10 mg/l

(c)	B.O.D.	:	<20 mg/l
(d)	C.O.D.	:	<50 mg/l
(e)	Total Suspended Solids	:	<10 mg/l
(h)	Color	:	Clear

c. Treatment Technology

Sequence Batch Reactor is a most prominent technique for removing organic carbon and nutrient in a relatively short period. The fill and draw scheme constitute the basic principle of the SBR system. Raw sewage will be collected under gravity into the equalization tank after allowing to pass through the bar screen. The bar screen, by removing coarse solids from the sewage help in protecting the raw sewage pump. The raw sewage equalization tank, through temporarily holding the incoming sewage facilitates both pumping of sewage through the STP and dampening the flow variation in the received sewage. The sewage collected in equalization tank is pumped and passed through the SBR tank. Air will be introduced in this tank to prevent any potential foul smell problem & to provide the mixing of wastewater to avoid the sedimentation of solids in this tank.

The SBR is basically a single tank that serves both biological reactor and settler in a temporal sequence, whereas aeration and settling are simultaneous but in a spatial sequence.

From the reactors, The suspended solids will settle at the bottom of the tank & clear supernatant will overflow to Collection cum storage tank collected sludge at bottom shall be transferred through pumps to sludge holding tank. The clear supernatant after clarifier will be collected in to filter feed tank. This tank will act as housing tank for filter feed pumps. The clarified & dis-infected water will be then fed to filtration unit.

Filtration unit consisting of Dual Media sand filter and activated carbon filter will remove the residual impurities such as odor/color, suspended solids, BOD/COD. The treated water after the filtration unit will be collected in Irrigation cum Flushing water storage tank from where it is transferred to flushing water tank at terrace & Irrigation System.

Excess sludge from the bottom of the settling tank will be removed and transferred to sludge holding tank. Air grid shall be provided in this tank to avoid conversion into anaerobic

conditions, thickening of sludge and keep sludge in homogenous condition. The digested & thickened sludge shall be further thickened through Sludge Dewatering System and disposed off periodically through closed tanker or can be reused as manure.

Stages of Treatment: The treatment process consists of the following stages:

- Equalization
- Bio- Degradation
- Clarification & Settling
- Filtration

Figure 3: Flow Diagram of SBR

Sewer System

The alignment and slope of the sewer line will follow the road network, drains or natural ground surface and will be connected to the trunk sewers. The discharge point will be a treatment plant, a pumping station, a water course or an intercepting sewer. Pumping stations would be provided at places where the natural slope of the terrain is insufficient to permit gravity flow or the cost of excavation is uneconomical to do the same.

Annexure-VIII
Traffic Management Plan

5.2 What are the impacts on generation of dust, smoke, odorous fumes or other hazardous gases? Give details in relation to all the meteorological parameters.

Source of pollution:-

As per dispersion modeling of pollutants from DG set using ISCST3 software, predicted resultant GLC for various air pollutants are found insignificant within the NAAQS norms.

5.3 Will the proposal create shortage of parking space for vehicles? Furnish details of the present level of transport infrastructure and measures proposed for improvement including the traffic management at the entry and exit to the project site.

Adequate provision will be made for car/vehicle parking at the project site. Parking details are provided below:

Adequate provision will be made for car/vehicle parking at the project site. There shall also be adequate parking provisions for visitors so as not to disturb the traffic and allow smooth movement at the site.

Table 8: Comparative Details of Parking

S. No.	Particulars	EC accorded (ECS)	Expansion (ECS)	Total (EC accorded + Expansion) (ECS)
1.	Parking	555	122	677

Parking Required:

As per MoEF&CC norms and Haryana Bye laws:

For Commercial $= 1.0 \text{ ECS}/50 \text{ m}^2$ of Carpet Area
 $= 1.0 \times 33,608.6 / 50$
 $= 672.172$ Say **672 ECS.**

Total parking required as per MoEF&CC norm and Haryana Bye laws = 672 ECS

PARKING PROPOSED:

Area proposed for basement with stack parking $= 7,728.53 \text{ m}^2$

Area required for 1 ECS of basement parking	= 35 m ²
Parking proposed for basement 1	= 290 ECS (including stack)
Area proposed for 2 nd basement	= 7,728.53 m ²
Area required for 1 ECS of basement parking	= 35 m ²
Parking proposed for 2nd basement	= 219 ECS
Area proposed for 3 rd basement	= 7,201.87 m ²
Area required for 1 ECS of basement parking	= 35 m ²
Parking proposed for 3rd basement	= 168 ECS.
Total Car Parking proposed in all Basement	= 677 ECS

5.4 Provide details of the movement patterns with internal roads, bicycle tracks, pedestrian pathways, footpaths etc, with areas under each category.

Internal roads of adequate width, footpaths/pedestrian pathways have been well planned for the project.

5.5 Will there be significant increase in traffic noise & vibrations? Give details of the sources and the measures proposed for mitigation of the above.

Significant impact of noise has been carried out within and outside of the project site. Noise, due to the traffic, within site, will result in a marginal increase in the noise levels because noise control measures shall be provided in vehicles & DG sets as mentioned below, which will cause slight increase in noise level.

5.6 What will be the impact of D.G. set and other equipment on noise levels and vibration in ambient air quality around the project site? Provide details.

During operation, vehicular movement and operation of DG set are the major sources of noise pollution. But both these activities- DG set and vehicular movement will not have any significant impact on the people residing in the area. The DG set will be enclosed with suitable enclosures,

Annexure-IX

Waste Management Plan during Construction & Operational Phase

- Provision of slit traps in storm water drains
- Good housekeeping in the above areas

10.2.4 EMP FOR LAND ENVIRONMENT

Construction Phase

The waste generated from construction activity includes construction debris, biomass from land clearing activities, waste from the temporary make shift tents for the labors and hazardous waste. Following section discuss the management of each type of waste. Besides waste generation, management of the topsoil is an important area for which management measures are required.

Construction Debris

Construction debris is bulky and heavy and re-utilization and recycling is an important strategy for management of such waste. As concrete and masonry constitute the majority of waste generated, recycling of this waste by conversion to aggregate can offer benefits of reduced landfill space and reduced extraction of raw material for new construction activity. This is particularly applicable to the project site as the construction is to be completed in a phased manner.

Mixed debris with high gypsum, plaster, shall not be used as fill, as they are highly susceptible to contamination, and will be send to designated solid waste landfill site.

Metal scrap from structural steel, piping, concrete reinforcement and sheet metal work shall be removed from the site by construction contractors. A significant portion of wood scrap will be reused on-site. Recyclable wastes such as plastics, glass fiber insulation, roofing etc shall be sold to recyclers.

Hazardous waste

Construction sites are sources of many toxic substances such as paints, solvents wood preservatives, pesticides, adhesives and sealants. Hazardous waste generated during

construction phase shall be stored in sealed containers and disposed off as per The Hazardous Wastes (Management, Handling & Trans boundary Movement) Rules, 2016.

Some management practices to be developed are:

- Herbicides and pesticide will not be over applied (small-scale applications) and not applied prior to rain.
- Paintbrushes and equipment for water and oil based paints shall be cleaned within a contained area and will not be allowed to contaminate site soils, water courses or drainage systems.
- Provision of adequate hazardous waste storage facilities. Hazardous waste collection containers will be located as per safety norms and designated hazardous waste storage areas will be away from storm drains or watercourses.
- Segregation of potentially hazardous waste from non-hazardous construction site debris.
- Well labeled all hazardous waste containers with the waste being stored and the date of generation.
- Instruct employees and subcontractors in identification of hazardous and solid waste.

Even with careful management, some of these substances are released into air, soil and water and many are hazardous to workers. With these reasons, the best choice is to avoid their use as much as possible by using low-toxicity substitutes and low VOC (Volatile Organic Compound) materials.

Waste from Temporary Makes Shift Tents for Labors

Wastes generated from temporary make shift labor tents which will be managed by the contractor of the site. The wastewater generated will be channelized to the septic tank.

Top Soil Management

To minimize disruption of soil and for conservation of top soil, the contractor shall keep the top soil cover separately and stockpile it. After the construction activity is over, top soil will be utilized for landscaping activity. Other measures, which would be followed to prevent soil erosion and contamination include:

- Maximize use of organic fertilizer for landscaping and green belt development
- To prevent soil contamination by oil/grease, leak proof containers would be used for storage and transportation of oil/grease and wash off from the oil/grease handling area shall be drained through impervious drains and treated appropriately before disposal
- Removal of as little vegetation as possible during the development and re-vegetation of bare areas after the project.
- Working in a small area at a point of time (phase wise construction)
- Construction of erosion prevention troughs/berms.

Operational Phase

The philosophy of solid waste management at the proposed complex will be to encouraging the four R's of waste i.e. **Reduction, Reuse, Recycling and Recovery** (materials & energy). Regular public awareness meetings will be conducted to involve the public in the proper segregation and storage techniques. The Environmental Management Plan for the solid waste focuses on three major components during the life cycle of the waste management system i.e., collection and transportation, treatment or disposal and closure and post-closure care of treatment/disposal facility.

Collection and Transportation

- During the collection stage, the solid waste of the project will be segregated into biodegradable waste and non-biodegradable. Biodegradable waste and non biodegradable waste will be collected in

separate bins. Biodegradable waste will be treated in the project premises by Organic waste convertor. The recyclable wastes will be sent off to recyclers. Proper guidelines for segregation, collection and storage will be prepared as per MSW Rules, 2016.

- To minimize littering and odour, waste will be stored in well-designed containers/ bins that will be located at strategic locations to minimize disturbance in traffic flow
- Care would be taken such that the collection vehicles are well maintained and generate minimum noise and emissions. During transportation of the waste, it will be covered to avoid littering.

Figure 6: Waste Management Flow Diagram

Organic Waste Converter

A waste converter is a machine used for the treatment and recycling of solid and liquid refuse material. A converter is a self-contained system capable of performing the following functions: pasteurization of organic waste; sterilization of pathogenic or biohazard waste; grinding and pulverization of refuse into unrecognizable output; trash compaction; dehydration.

Benefits of organic waste converter:

1. Large quantity of solid waste is converted to manure in a very short period
2. Manure can be used as compost for gardening
3. Machine requires less space and the efficiency is high
4. Manpower and maintenance is very less
5. This is one of the latest techniques of managing biodegradable solid waste.

Operation cost of OWC:

Organic Waste Converter - 300 (Dim. 3m × 4m) is proposed to be used for composting waste 120kg/batch or 3000 kg/day & it requires electricity of about 13.5 HP.

No. of batches /day = $3000/120 = 25$ batches/day.

No. of batches to convert 490 kg/day = $490/120 = 4.08$ say 4 batches.

Operation Cost-monthly per capita:

The operating cost of OWC - 300 = 1, 80,000 INR/month

Cost/day = $1, 80,000/30$
= 6000/-

1 batch/day cost = $6000/25$
= 240 INR

Cost for 4 batch/day = $4 \times 240/-$
= 960/-

Monthly operating cost = 30×960
= Rs. 28,800/- per month

Disposal

With regards to the disposal/treatment of waste, the management will take the services of the authorized agency for waste management and disposal of the same on the project site during its operational phase.

10.2.5 EMP FOR ECOLOGICAL ENVIRONMENT

Construction activity changes the natural environment. The project requires the implementation of following choices exclusively or in combination.

Construction Stage

- Restriction of construction activities to defined project areas, which are ecologically sensitive
- Restrictions on location of temporary labor tents and offices for project staff near the project area to avoid human induced secondary additional impacts on the flora and fauna species
- Cutting, uprooting, coppicing of trees or small trees if present in and around the project site for cooking, burning or heating purposes by the labors will be prohibited and suitable alternatives for this purpose will be made
- Along with the construction work, the peripheral green belt would be developed with suggested native plant species, as they will grow to a full-fledged covered at the time of completion.

Operation Stage

Improvement of the current ecology of the project site will entail the following measures:

- Plantation and Landscaping
- Green Belt Development
- Park and Avenue Plantation

Annexure-XII
Water Balance Chart

1.9 Whether construction debris & waste during construction cause health hazard? (Give quantities of various types of wastes generated during construction including the construction labor and the means of disposal).

No health hazards are expected during the construction phase. The laborers will be provided with face masks to minimize dust inhalation.

A significant portion of the construction waste and wood scrap generated will be used on the site. The quantity of domestic waste generated was very little, as mostly local laborers will be employed. However, the wastes generated will be collected and disposed by an authorized agency.

SECTION 2- WATER ENVIRONMENT

1.1 Give the total quantity of water requirement for the project with the breakup of requirements for various uses. How will the water requirement be met? State the sources & quantities and furnish a water balance statement.

During operation phase, the agency of fresh water supply will be from HUDA. The total water requirement for the Commercial Complex project (post expansion) will be approx. 337 KLD out of which domestic water demand is 139 KLD. The fresh water requirement will be 42 KLD. However, one time fresh water demand for the project will be 337 KLD. The comparative water calculation is given below in Table 4.

Table 4: Comparative Details of Water & Wastewater generated

S. No.	Particulars	EC accorded (KLD)	Expansion (KLD)	Total (EC accorded + Expansion) (KLD)
1.	Total Water Requirement	375	-38	337
2.	Fresh Water Requirement	129	-87	42
3.	Waste water generation	260	-129	131
4.	STP capacity	315	-155	160

Table 5: Calculations for Daily Water Demand

S. No.	Unit Type	Occupancy	Rate of demand (lpcd)	Total water requirement (KLD)
A	Domestic Water			
1	Ground Floor (Retail Shop)			
	• Staff	131	30	4
	• Visitors	1183	15	18
2	First to Nineteenth Floor (Office)			
	• Staff	3305	30	99
	• Visitors	367	15	6
3.	Sky Lounge (Terrace)			
	• Visitors	794	15	12
TOTAL DOMESTIC WATER DEMAND = 139 KLD				
B	HORTICULTURE (2423.82m ²)		1 l/sqm/day	3 KLD
C	HVAC (1650 TR)	10 hours	@10 Litre/TR	165 KLD
D.	DG Cooling (3 X 1500 KVA + 1 X 1000 KVA)	0.9 lt/kva/hr		30 KLD
GRAND TOTAL (A+B+C) = 337 KLD				

*DG Sets water demand are calculated for 6 Hours operation/day.

Table 6: Waste Water Calculations

Domestic Water Requirement	139 KLD
• Fresh water (@30% of domestic water)	42 KLD
• Flushing water (@ 70% of domestic water)	97 KLD
Waste Water Generated (@ 80% fresh water + 100% flushing water)	34 +97 = 131 KLD
STP Capacity	160 KL

The water balance diagrams for different seasons are shown below:

Figure 1: Water Balance Diagram (Non-Rainy Season)

Figure 2: Water Balance Diagram (Rainy Season)

Wastewater Generation & Treatment

It is expected that the project will generate approx. 131KLD of wastewater. The wastewater will be treated in onsite STP of 160 KL capacity. The treated effluent 118 KLD will be reused for flushing, horticulture, DG Cooling & HVAC.

262, DDA Office Complex, Jhandewala Ext.,
New Delhi-110055
Email Id: astheticsector27gurugram@gmail.com

Gurugram/Date: 26.08.2022

Subject: Assurance letter for supply of fresh water commissioning for domestic purpose for Commercial Complex at Sector 27, Gurgaon measuring area 2.851 acres, License No. 97 of 2011 dated 09.11.2011.

Reference: Your Application dated 03.08.2022.

With reference to the cited subject, it is intimated that the GMDA Master Water Supply line of 600mm i/d exists on Sec-27/43 Dividing Road (near Park Plaza Hotel) and on MG Road (near Regent Plaza Mall) from your site. The water connection can be taken by your firm from the existing master water supply line of this area after completing the necessary compliances as per GMDA's notification in this regard. Thus, assurance is hereby issued for providing new water supply connection to the project/license cited under subject.

Remarks:
Please Note: The concrete delivered is subject to the terms and conditions of sales shown in our literature. The time is allowed for unloading the delivery is 15 minutes. We reserve the right to charge for any detention beyond the time as per our conditions. We do not warrant addition of water and are not responsible for concrete shrinkage or any other liability whatsoever. Any deficiency in quantity of placing, compacting, finishing and curing of concrete supplied at the site will affect the quality of concrete and the finished work, for which we shall not be held liable and responsible. Any deficiency in quantity and quality (except comp. strength) of concrete supplied in the load shall be reported to us in writing within 24 hours from the time of supply, as no more claims will be entertained for delay, defect, shrinkage or consequential damage arising out of use of the product, even if absence of possibility of such damage. In no case shall our liability exceed the purchase price of such product. In case of any dispute/purchase in the future please inform us within 3 working days from the date of invoice, otherwise it will be assumed that the invoice is correct and accepted. 10% interest per annum will be charged from the date of invoice on the amount remaining pending or wholly unpaid after due date. This document is generated as a Delivery Challan. (Double confirm the quantity received by the customer.)
We have accepted delivery of concrete as per the delivery mentioned above. 2. We have authorized addition of any water and admixtures as mentioned above.

Certified that the particulars given above are true and correct and amount indicated represents the price charged and that there is no flow of additional consideration directly or indirectly from the buyer

For RDC Concrete (India) Pvt Ltd.

Authorized Signatory

Caution: Cement and concrete contain lime and other chemicals which can cause irritation, dermatitis and burning. To avoid harm to skin, minimize contact with wet concrete and wear suitable protective clothing. Whenever contact occurs (whether directly or through saturated clothing) wash thoroughly.

Annexure-XV
RWH Details

2.3 How much of water requirement can be met from the recycling of treated wastewater? (Give the details of quantities, sources and usage)

It is expected that the project will generate approx. 131 KLD of wastewater. The wastewater will be treated in onsite STP of 160 KL capacity. The treated effluent 118 KLD will be reused for flushing, horticulture, DG Cooling & HVAC.

2.4 Will there be diversion of water from other users? (Please assess the impacts of the project on other existing uses and quantities of consumption).

No. There will not be any diversion of water from other users. Rise in water demand is a local phenomenon but the project would only involve spatial shifting of water demand within a region.

2.5 What is the incremental pollution load from wastewater generated from the proposed activity? (Give details of the quantities and composition of wastewater generated from the proposed activity)

131 KLD of sullage generated which will be treated through onsite STP of 160 KL capacity.

2.6 Give details of the water requirements met from water harvesting? Furnish details of the facilities created.

The storm water collection system for the premises shall be self-sufficient to avoid any collection/stagnation and flooding of water. The amount of storm water run-off depends upon many factors such as intensity and duration of precipitation, characteristics of the tributary area and the time required for such flow to reach the drains. The drains shall be located near the carriage way along either side of the roads. Taking the advantage of road camber, the rainfall run off from roads shall flow towards the drains. Storm water from various plots/shall be connected to adjacent drain by a pipe through catch basins. Therefore, it has been calculated to provide 3 rainwater harvesting pits at selected locations, which will catch the maximum run-off from the site.

- 1) Since the existing topography is congenial to surface disposal, a network of storm water pipe drains is planned adjacent to roads. All building roof water will be brought down through rain water pipes.

- 2) Proposed storm water system consists of pipe drain, catch basins and seepage pits at regular intervals for rain water harvesting and ground water recharging.
- 3) For basement parking, the rainwater from ramps will be collected in the basement storm water storage tank. This water will be pumped out to the nearest external storm water drain.
- 4) The peak hourly rainfall of 45 mm/hr shall be considered for designing the storm water drainage system.

Rain water harvesting has been catered to and designed as per the guideline of CGWA. Peak hourly rainfall has been considered as 45 mm/hr. The recharge pit of 4 m diameter and 3 m depth is constructed for recharging the water. Inside the recharge pit, a recharge bore is constructed having adequate diameter and depth. The bottom of the recharge structure will be kept 5m above this level. At the bottom of the recharge well, a filter media is provided to avoid choking of the recharge bore. Design specifications of the rain water harvesting plan are as follows:

- Catchments/roofs would be accessible for regular cleaning.
- The roof will have smooth, hard and dense surface which is less likely to be damaged allowing release of material into the water. Roof painting has been avoided since most paints contain toxic substances and may peel off.
- All gutter ends will be fitted with a wire mesh screen and a first flush device would be installed. Most of the debris carried by the water from the rooftop like leaves, plastic bags and paper pieces will get arrested by the mesh at the terrace outlet and to prevent contamination by ensuring that the runoff from the first 20 minutes of rainfall is flushed off.
- No sewage or wastewater would be admitted into the system.
- No wastewater from areas likely to have oil, grease, or other pollutants has been connected to the system.

Table 7: Comparative Details of Rain water Harvesting

S. No.	Particulars	EC accorded	Expansion	Total (EC accorded + Expansion)
1.	Rain water Harvesting Pits	3	---	3

Calculations for storm water load :

$$\text{Net Plot Area} = 11,537.57 \text{ m}^2$$

$$\text{Roof-top area} = \text{Ground Coverage} = 4,524.140 \text{ m}^2$$

$$\text{Green Area} = 2,423.82 \text{ m}^2$$

$$\begin{aligned}\text{Paved area} &= \text{Net Plot Area} - (\text{Roof-top Area} + \text{Green Area}) \\ &= 11537.57 - (4524.140 + 2423.82) \\ &= 4589.61 \text{ m}^2\end{aligned}$$

Run-off Load.

$$\begin{aligned}\text{Roof-top Area} &= 4524.140 \times 0.045 \times 0.9 \\ &= 183.227 \text{ m}^3/\text{hr.}\end{aligned}$$

$$\begin{aligned}\text{Green Area} &= 2423.82 \times 0.045 \times 0.2 \\ &= 21.81 \text{ m}^3/\text{hr.}\end{aligned}$$

$$\begin{aligned}\text{Paved Area} &= 4,589.61 \times 0.045 \times 0.7 \\ &= 144.57 \text{ m}^3/\text{hr.}\end{aligned}$$

$$\begin{aligned}\text{Total Runoff Load} &= 183.227 + 21.81 + 144.57 \text{ m}^3/\text{hr.} \\ &= 349.607 \text{ m}^3/\text{hr.}\end{aligned}$$

Taking 20 minutes retention time, volume of storm water = $349.607 / 3 = 116.53 \text{ m}^3$

$$\text{Capacity of Recharge pit} = \pi r^2 h = 3.14 \times 2 \times 2 \times 3 = 37.68 \text{ m}^3$$

Hence No. of pits required = $116.53 / 37.68 = 3$ pits

Total of 3 Rain Water Harvesting pits are proposed for artificial ground water recharge.

2.7 What would be the impact of the land use changes occurring due to the project on the runoff characteristics (quantitative as well as qualitative) of the area in the post construction phase on a long term basis? Would it aggravate the problems of flooding or water logging in any way?

(Page 1 of 1)

Sample Particulars: Ambient Noise Level Monitoring was done at Commercial Complex project at Sushant Lok, Sec- 27, Gurugram Haryana, on 01/02/2023 to 02/02/2023.

Type of sample	: Ambient Noise	Sample Registration Date	: 02/02/2023
Sampling Date	: 01/02/2023-02/02/2023	Analysis Starting Date	: 02/02/2023
Sampling Done by	: Lab representative	Analysis Completion Date	: 03/02/2023
Quantity received	: 24 Hourly Sample	Tests Required	: Mentioned below
Sample's Location	: Water Body Area Entrance Lobby	Sampling Method	: ELPL/III/SOP/37

Time	Unit	Leq	Method
Day Time(06:00 am to 10:00 pm)	dB (A)	62.7	ELPL/III/SOP/37
Night Time(10:00 pm to 06:00 am)	dB (A)	51.8	ELPL/III/SOP/37

Standards for Ambient Noise As per Noise Pollution (Regulation & Control Rule-2000)			
Area Code	Category of Area/Zone	Limits in dB (A) Leq*	
		Day time	Night time
(A)	Industrial area	75	70
(B)	Commercial area	65	55
(C)	Residential area	55	45
(D)	Silence Zone	50	40

Environmental Monitoring Report

1. Ambient Air Quality Monitoring

Ambient air quality monitoring has been done quarterly basis at locations AAQ-1 (DG Yard Area) & AAQ-1 (Water Body Area Entrance Lobby) for 24 Hrs. The detail of monitoring schedule is given in Table-1.

Table 1: Schedule of Ambient Air Quality Monitoring

S. No.	Duration of sampling (hours)	Date		Sample collected on	Location
		From	To		
1	24	18/11/2022	19/11/2022	19/11/2022	AAQ-1 (DG Yard Area)
2	24	01/02/2023	02/02/2023	02/02/2023	AAQ-1 (Water Body Area Entrance Lobby)

Sulphur Dioxide (SO₂)

Monitoring results of SO₂ are given in Table-1 (a) and graphical representation is given in Figure-1 (a)

Table- 1(a): Monitoring results for SO₂

S. No.	Sampling dates	Location Code	Sampling duration	Results (µg/m ³)	NAAQS (as per CPCB), µg/m ³
1	18/11/2022 to 19/11/2022	AAQ - 1	24 Hourly	15.2	80
2	01/02/2023 to 02/02/2023	AAQ - 1	24 Hourly	14.9	80

Figure-1(a): SO₂ concentrations

**"Commercial Complex Project" located at Sushant Lok, Sec-27, Gurugram Haryana
by M/s Asthetic Township Developers Pvt. Ltd.**

The concentration of SO₂ was observed below permissible Limit as per NAAQS.

Nitrogen Dioxide (NO₂)

Monitoring results of NO₂ is given in Table-1 (b) and graphical representation is given in Figure-1 (b)

Table-1 (b) Monitoring results for NO₂

S. No.	Sampling dates	Location Code	Sampling duration	Results (µg/m ³)	NAAQS (as per CPCB), µg/m ³
1	18/11/2022 to 19/11/2022	AAQ - 1	24 Hourly	39.4	80
2	01/02/2023 to 02/02/2023	AAQ - 1	24 Hourly	38.4	80

Figure 1 (b): NO₂ concentrations

The concentration of NO₂ was below the limits as permissible limit as per NAAQS.

Particulate Matter

PM₁₀: Monitoring results of PM₁₀ is given in Table- 1(c) and graphical representation is given in Figure- 1(c).

Table-1 (c): Monitoring results for PM₁₀

S. No.	Sampling dates	Location Code	Sampling duration	Results (µg/m ³)	NAAQS (as per CPCB), µg/m ³
1	18/11/2022 to 19/11/2022	AAQ - 1	24 Hourly	264	100
2	01/02/2023 to 02/02/2023	AAQ - 1	24 Hourly	246	100

Figure 1 (c): PM₁₀ concentrations

The concentration of PM₁₀ was found higher than permissible limit by NAAQS.

PM_{2.5}: Monitoring results of PM_{2.5} is given in Table-1 (d) and graphical representation is given in Figure- 1 (d)

Table 1 (d): Monitoring results for PM_{2.5}

S. No.	Sampling dates	Location Code	Sampling duration	Results (µg/m³)	NAAQS (as per CPCB), µg/m³
1	18/11/2022 to 19/11/2022	AAQ - 1	24 Hourly	179.6	60
2	01/02/2023 to 02/02/2023	AAQ - 1	24 Hourly	142.1	60

Figure 1 (d): PM_{2.5} concentrations

**"Commercial Complex Project" located at Sushant Lok, Sec-27, Gurugram Haryana
by M/s Asthetic Township Developers Pvt. Ltd.**

The concentration of $PM_{2.5}$ was found to be higher than permissible limit by NAAQS.

Carbon Monoxide (CO)

Monitoring results of CO is given in Table-1(e) and graphical representation is given in Figure-1(e)

Table -1 (e): Monitoring results for CO

S. No.	Sampling dates	Location Code	Sampling duration	Results (mg/m^3)	NAAQS (as per CPCB), mg/m^3
1	18/11/2022 to 19/11/2022	AAQ - 1	08 Hourly	0.36	02
2	01/02/2023 to 02/02/2023	AAQ - 1	08 Hourly	0.40	02

Figure 1 (e): CO concentrations

The concentration of CO was within the limit as prescribed by NAAQS.

2. Noise Monitoring

Noise monitoring was done quarterly basis at location ANQ-1 (DG Yard Area) & ANQ-1 (Water Body Area Entrance Lobby) for 24 Hrs. The details of monitoring are given in Table-(2)

Table 2: Schedule of Noise Monitoring

S. No.	Duration of sampling (hours)	Date		Sample collected on	Location
		From	To		
1	24	18/11/2022	19/11/2022	19/11/2022	ANQ-1 (DG Yard Area)
2	24	01/02/2023	02/02/2023	02/02/2023	ANQ-1 (Water Body Area Entrance Lobby)

**"Commercial Complex Project" located at Sushant Lok, Sec-27, Gurugram Haryana
by M/s Asthetic Township Developers Pvt. Ltd.**

Monitoring has been done for 24 hours. The results for day time & night time observations are given below:

Day Time

Monitoring results of daytime is given in Table- 2 (a) and graphical representation is given in Figure- 2 (a)

Table 2 (a): Day Time monitoring result

S. No.	Monitoring Locations	Duration of Monitoring	Results dB(A)	Permissible Limit dB(A) (as per CPCB)
1	ANQ - 1	Day time (6:00 AM to 10:00 PM)	63.9	65
2	ANQ - 1	Day time (6:00 AM to 10:00 PM)	62.7	65

Figure 2 (a): Graph showing day time noise monitoring result

The day noise result was found to be within the limit as prescribed by NAAQS.

Night Time

Monitoring results of night time is given in Table - 2(b) and graphical representation is given in Figure-2 (b).

Table - 2 (b): Night Time monitoring result

S. No.	Monitoring Locations	Duration of Monitoring	Results dB(A)	Permissible Limit dB(A) (as per CPCB)
1	ANQ - 1	Night time (10:00 PM to 06:00AM)	50.7	55
2	ANQ - 1	Night time (10:00 PM to 06:00AM)	51.8	55

Figure 2 (b): Graph showing night time noise monitoring result

The night noise result was found to be within the limit as prescribed by NAAQS.

3. Drinking Water Monitoring

Schedule for Drinking water monitoring is given in Table 3.

Table 3: Schedule for Drinking water sample collection

Day of sampling	Sample collected on	Location
Day 1	18/11/2022	Kitchen Area
Day 1	01/02/2023	Kitchen Panty Area

Drinking water for Day-1 monitoring results given in Table 3(a).

Table 3(a): - Drinking Water Monitoring Results (18/11/2022)

Environment Management Plan

ENVIRONMENT MANAGEMENT PLAN AND ENVIRONMENT MONITORING PLAN

ENVIRONMENT MANAGEMENT PLAN

The Environment Management Plan (EMP) would consist of all mitigation measures for each component of the environment due to the activities increased during the construction, operation and the entire life cycle to minimize adverse environmental impacts resulting from the activities of the project. It would also delineate the environmental monitoring plan for compliance of various environmental regulations. It will state the steps to be taken in case of emergency such as accidents at the sites including fire. The detailed EMP for the complex is given below.

Environmental Management Plan

The Environment Management Plan (EMP) is a site specific plan developed to ensure that the project is implemented in an environmental sustainable manner where all contractors and subcontractors, including consultants, understand the potential environmental risks arising from the project and take appropriate actions to properly manage that risk. EMP also ensures that the project implementation is carried out in accordance with the design by taking appropriate mitigation actions to reduce adverse environmental impacts during its life cycle. The plan outlines existing and potential problems that may adversely impact the environment and recommends corrective measures where required. Also, the plan outlines roles and responsibility of the key personnel and contractors who will be in-charge of the responsibilities to manage the project site.

The EMP is generally

- Prepared in accordance with rules and requirements of the MoEF and CPCB/ SPCB
- To ensure that the component of facility are operated in accordance with the design
- A process that confirms proper operation through supervision and monitoring
- A system that addresses public complaints during construction and operation of the facilities and
- A plan that ensures remedial measures is implemented immediately.

The key benefits of the EMP are that it offers means of managing its environmental performance thereby allowing it to contribute to improved environmental quality. The other benefits include cost control and improved relations with the stakeholders.

EMP includes four major elements:

- **Commitment & Policy:** The management will strive to provide and implement the Environmental Management Plan that incorporates all issues related to air, water, land and noise.
- **Planning:** This includes identification of environmental impacts, legal requirements and setting environmental objectives.
- **Implementation:** This comprises of resources available to the developers, accountability of contractors, training of operational staff associated with environmental control facilities and documentation of measures to be taken.
- **Measurement & Evaluation:** This includes monitoring, counteractive actions and record keeping.

It is suggested that as part of the EMP, a monitoring committee would be formed by M/s Aesthetic Township Developers Pvt. Ltd., comprising of the site in-charge/coordinator, environmental group representative and project implementation team representative. The committee's role would be to ensure proper operation and management of the EMP including the regulatory compliance.

The components of the environmental management plan, potential impacts arising, out of the project and remediation measures are summarized below in **Table 1** and EMP for dust suppression is mentioned in **Table 2**.

TABLE 1: SUMMARY OF POTENTIAL IMPACTS AND REMEDIAL MEASURES

S. No.	Environmental components	Potential Impacts	Potential Source of Impact	Controls Through EMP & Design	Impact Evaluation	Preventive Measures
1.	Ground Water Quality	Ground Water Contamination	<u>Construction Phase</u> - Sewage generated from temporary labor tents. <u>Operation Phase</u> - Sewage Discharge from the project	- Mobile STP and treated sewage will be used for construction purposes. - Proponent will provide the STP to treat the sewage of Project.	No significant impact as majority of labors would be locally deployed No negative impact on ground water quality envisaged. Not significant.	-- In an unlikely event of soil and ground water contamination. Remediation measures will be implemented.
2.	Ground Water Quantity	Ground Water Depletion	<u>Construction Phase</u> - Ground water will be not be used during construction. <u>Operation Phase</u> - Groundwater will not during operation phase. The required water will be met through the municipal supply	- Not Applicable - Rain water harvesting scheme. - Black and Grey water treatment and reuse. - Storm water collection for water harvesting. - Percolation well to be introduced in landscape plan. - Awareness Campaign to	No significant impact on ground water quantity envisaged. No significant impact on surface/ground water quantity envisaged.	In an unlikely event of non-availability of water supply, water will be brought using tankers.

S. No.	Environmental components	Potential Impacts	Potential Source of Impact	Controls Through EMP & Design	Impact Evaluation	Preventive Measures
				reduce the water consumption		
3.	Surface Water Quality	Surface water contamination	<u>Construction Phase</u> • Surface runoff from site during construction activity.	• Silt traps and other measures such as additional onsite diversion ditches will be constructed to control surface run-off during site development	No off-site impact envisaged as no water surface receiving body is present in the core zone.	--
			<u>Operation Phase</u> • Discharge of domestic wastewater to STP.	• Domestic water will be treated in STP	No off-site impact envisaged	Excess of water will be discharged as per CPCB standards.
4.	Air Quality	Dust Emissions	<u>Construction Phase</u> • All heavy construction activities	• Suitable control measures will be adopted for subsiding the PM level in the air as per air pollution control plan.	Not significant because dust generation will be temporary and will settle fast due to dust suppression techniques (wet dust scrubbers) used.	During construction phase the contractors are advised to facilitate masks for the labors. Water sprinklers will be used for suppression of dust during construction phase.
		Emissions of SPM, SO ₂ , NO ₂ and CO	<u>Construction Phase</u> • Operation of construction	• On-site construction and improved maintenance of equipment	Not significant.	Regular monitoring of emissions and control measures will be taken

S. No.	Environmental components	Potential Impacts	Potential Source of Impact	Controls Through EMP & Design	Impact Evaluation	Preventive Measures
			equipment and vehicles during site development. • Running D.G. sets (back up)			to reduce the emission levels.
			<u>Operation Phase</u> - Power generation by DG Sets during power failure - Emission from vehicular traffic in use <u>Construction Phase</u> - Operation of construction equipment and vehicle movements during site development. - Running DG sets (for power back up)	- Use of Low Sulphur diesel if available - Use of clean fuel if available - Green belt will be developed with specific species to help to reduce PM level - Use of equipment fitted with silencers - Proper maintenance of equipment - Provision of noise shields near the heavy construction operations and acoustic enclosures for DG sets - Construction activity will be limited to day time hours only	Not significant	Regular monitoring of emissions and control measures will be taken to reduce the emission levels.

S. No.	Environmental components	Potential Impacts	Potential Source of Impact	Controls Through EMP & Design	Impact Evaluation	Preventive Measures
5.	Noise Environment		<u>Operation Phase</u> - Noise from vehicular movement - Noise from DG sets operation	Green Belt Development shall make a barrier both for noise and air pollution.	No significant impact due to 10m. width of Greenbelt.	Use of Personal Protective Equipment (PPE) like earmuffs and earplugs during construction activities
6.	Land Environment	Soil contamination	<u>Construction Phase</u> Disposal of construction debris	Construction debris will be collected and suitably used on site.	No significant impact. Impact will be local, as waste generated will be reused for filling of low lying areas etc.	--
			<u>Operation Phase</u> Dumping of municipal solid waste on land.	It is proposed that the solid waste generated will be managed by an authorized agency. Collection, segregation, transportation and disposal will be done as per Solid Waste Management Rules, 2016 by the authorized agency Organic waste converter	Since solid waste is handled by the authorized agency, waste dumping is not going to be allowed. Not significant. Negligible impact.	--

S. No.	Environmental components	Potential Impacts	Potential Source of Impact	Controls Through EMP & Design	Impact Evaluation	Preventive Measures
				will be installed.		
7.	Biological Environment (Flora and Fauna)	Displacement of Flora and Fauna on site	<u>Construction Phase</u> Site Development during construction No tree at the site.	Additional tree will be planted as part of the green belt development.	The site has no tree.	
			<u>Operation Phase</u> Increase in green cover	Green belts will be developed as per landscaping plan in and around the site using local flora	Beneficial impact.	
8.	Socio-Economic Environment	Employment and livelihood options.	<u>Construction Phase</u> Construction activities leading to gain in direct & indirect employment	Project development as per the Building bye laws.	No negative impact. 400 employment will be generated.	
			<u>Operation Phase</u>	Project will provide employment opportunities to the local people in terms of labor during	Beneficial impact	

S. No.	Environmental components	Potential Impacts	Potential Source of Impact	Controls Through EMP & Design	Impact Evaluation	Preventive Measures
			Site operation	construction and service personnel (staff, securities, gardeners etc.) during operations • Providing quality-Integrated facility in Ghaziabad		
9.	Traffic Pattern	Increase of Vehicular traffic	<u>Operation Phase</u> Site operation	Internal Traffic management plan	Beneficial impact	
			<u>Operation Phase</u> • Traffic due to people.	• Vehicular movement will be regulated inside the project with adequate roads and parking lots in the site.	No major significant impact	

TABLE 2: EMP FOR DUST SUPPRESSION

Sources/Process	Emission Potential	Scope of Control	Effectiveness
Hydraulic excavators and loaders (e.g. Front loader, backhoe face shovel bulldozers) for the excavation, lifting and movement of material such as Soil, overburden.	High when dry or fine silty material are being handled, particularly during strong windy weather	Use of water sprays to moisten material being handled. Soils may be subject to a soil moisture content planning condition	Moderate
	Low when coarse or wet material are being handled during conditions of low wind speed	Minimize drop heights when unloading material. Protect from exposure to wind where possible.	
Tractor scrapers (Soil strippers) for cutting, lifting transporting and placing, spreading or shaping of soils	Moderate/High-when dry silty materials handled during windy weather	Use of water sprays to moisten material being handled.	Low
Vehicles for transport of material within the site.	High particularly when travelling over unsurfaced and dry site roads.	Minimize onsite transportation distances.	High
		Use of water sprays to moisten road surfaces during dry weather.	
		Use mechanical road sweepers during dry weather, to limit visible dust emissions. Restrict vehicle speeds through signage/staff training.	
		Use of covered conveyors to transport material around the site.	
Hydraulic breakers for size reduction of large rocks	Low	Water spraying of rock prior to fragmentation when high degree of control required.	Moderate
Exhausts and cooling fans on mobile plant	High if unmitigated.	Mobile plant exhausts and cooling fans will discharge	Moderate

Sources/Process	Emission Potential	Scope of Control	Effectiveness
processing quarried material.		above the horizontal to prevent dust mobilization.	
Conveyors for transporting material	Moderate if not protected from wind	Enclosure of transfer points (including roofing) of conveyors.	High
		Wind boarding.	High
	Moderate/High for dry or fine silty materials, particularly during strong wind weather	Water spraying of surfaces of material on conveyor.	High/Moderate
		Cleaning belts with scrapers and collecting scrapings in container.	Moderate
Stockpiles for storage of quarried materials and soil/overburden during extraction and site development phases.	High when dry or fine silty materials are being stored /handled particularly during strong weather.	Seed surfaces of completed mounds of overburden and top soil (restoration materials).	High
		Limit mechanical disturbance.	
		Shield from wind e.g. through the use of tree planting or screening	
		Use of water sprays to moisten surfaces during dry weather.	Moderate

ENVIRONMENTAL MONITORING

The purpose of environmental monitoring is to evaluate the effectiveness of implementation of Environmental Management Plan (EMP) by periodic monitoring. The important environmental parameters within the impact area are selected so that any adverse affects are detected and time action can be taken. The project proponent will monitor ambient air Quality, Ground Water Quality and Quantity, and Soil Quality in accordance with an approved monitoring schedule mentioned in **Table 3**.

Table 3: Environmental Monitoring Schedule for Compliance

S. No	Particulars	Monitoring Frequency	Duration of Sampling	Important Monitoring Parameters
1	Ambient Air Quality Monitoring			
	Project site	Once in 6 Months	24 hr continuously except CO (8 hourly)	PM ₁₀ , PM _{2.5} , SO ₂ , NO ₂ & CO
3	Ambient Noise Level			
	Near DG set	Once in 6 Months	8 hr continuous with 1 hr interval	Noise level in dB(A)
4	Ground/Drinking Water Quality Monitoring			
	Ground Water – (If applicable)	Once in 6 Months	Grab Sampling	Parameters specified under IS:10500, 2012
5	Soil Quality			
	At the green belt area	Twice in a year	Samples will be collected from three different depths viz., 30cm, 60cm, and 100cm below the surface	Parameter for soil quality: pH, texture, electrical conductivity, organic matter, nitrogen, phosphate, sodium, calcium, potassium and Magnesium.

PUBLIC NOTICE

The Director Town & Country Planning, Haryana has granted license no. 97 of 2011, LO-2400 dated 09/11/2011 for area measuring 2.851 acres in the revenue estate of village Sukhnai, Section-27, District Gurgaon for developing commercial colony being developed by Aesthetic Township Developer's Private Limited having its registered office 252, ODA Office Complex, Jhandewalan Extn, New Delhi - 110055. The company intends to revise the layout plan building plans of the proposed land measuring 2.851 acres approved under license no. 97 of 2011. As per terms of the license we hereby invite objections from the existing allottees if any, regarding the said amendments in the layout plans. The existing and amended layout plans are hosted in our office. The revised building plans bearing memo no. ZP-902/JD(NCY/2020/4722) Dated: 16/02/2020 are there to examine in the office. The objections if any to the proposed revision of layout plans may please be sent to the ODO DTP, Gurgaon within 30 days from the date of publication of this notice.

To

M/s S.S Construction Co.
C/o M/s Asthetic Township Developers Pvt. Ltd.
Sector-27, Near Millenium Plaza,
Gurugram

Memo No: H.T.I/ 14110

Dated: 21/08/2020

Subject: Inspection of HT installation comprising of 1x200 KVA 11/0.433KV T/F installed at S.S Construction Co., Gurugram.

The subject cited installation was inspected by this department on 21.08.2020 and the same was found generally complying with the relevant provisions of CEA (Measures Relating to Safety and Electric Supply) Regulations, 2010.

The following observations be attended under intimation to this office:

1. Earth pits be maintained and marked properly for identification.

Approval for energisation of the subject cited installations is hereby accorded subject to consistent compliance of the relevant provisions of CEA Regulations, 2010 in the installation at your end. Please note that it shall be the responsibility of the owner of electrical installations to maintain and operate the installations in a condition free from danger and as recommended by the manufacturer or by the relevant code of practice of the Bureau of Indian Standards.

Your next inspection shall fall due in the month of August every year. You are therefore requested to deposit inspection fee as per schedule under the Head of A/c "0043-Taxes and Duties on Electricity Fees payable under I.E Rules, 1956" and send the original receipted treasury challan to this office one month before the due date.
